ACKNOWLEDGEMENT OF ASSISTANCE

All manuscripts utilizing data made available through the Consortium should acknowledge that fact as well as identify the original collector of the data. The ICPSR Council urges all users of the ICPSR data facilities to follow some adaptation of this statement with the parentheses indicating items to be filled in appropriately or deleted by the individual user.

The data (and tabulations) utilized in this (publication) were made available (in part) by the Inter-university Consortium for Political and Social Research. The data for the JUVENILE CORRECTIONAL FACILITY CENSUS, 1985 were originally collected by the Office of Juvenile Justice and Delinquency Prevention and the U.S. Dept. of Justice, Bureau of Justice Statistics. Neither the collector of the original data nor the Consortium bear any responsibility for the analyses or interpretations presented here.

In order to provide funding agencies with essential information about the use of archival resources and to facilitate the exchange of information about ICPSR participants' research activities, each user of the ICPSR data facilities is expected to send two copies of each completed manuscript or thesis abstract to the Consortium. Please indicate in the cover letter which data were used.

DATA COLLECTION DESCRIPTION

The Public Juvenile Detention, Correctional and Shelter Facility Census, 1985 is the eighth in a series of data collection efforts aimed at providing information on the number and type of juveniles placed in state and local residential facilities for juvenile offenders across the 50 states and the District of Columbia. The original census occurred in 1971 and supplanted the survey of Public Institutions for Delinquent Children conducted by the Department of Health, Education, and Welfare. The 1971 census covered 722 public detention and correction facilities and they were classified as either 1.) detention centers, 2.) shelters, 3.) reception and diagnostic centers, 4.) training schools, 5.) ranches, forestry camps and farms, or 6.) halfway houses and group homes. This classification system was based on responses to the questionnaire which asked the respondent to mark the type facility most applicable. Multi-function facilities, such as training schools with detention or reception centers were classified according to the function having the largest capacity or resident population. This system has been used throughout the series of censuses. The survey questionnaire was substantially revised for the 1977 census to provide data that would better meet the programmatic, analytic, and evaluative needs arising from the Juvenile Justice and Delinquency Prevention Act (JJDP) of 1974. The data collected in that and the 1979 census provided a new facility classification framework to better measure the extent to which the Act has resulted in modification to the structure and function of the nation's public juvenile custody facilities.

Under an interagency agreement, the Department of Justice contracts with the Bureau of the Census to conduct a biennial census of public juvenile detention, correctional and shelter facilities. The census provides information on the number and type of juveniles placed in residential facilities for juvenile offenders across 50 states and the District of Columbia, and related statistics such as average length of stay, degree of security, capacity, detention statistics, age ranges, admissions and releases, type of offense and other facility characteristics such as annual expenditures.

DATA COLLECTION PROCEDURES

The 1985 Public Juvenile Facility Census covered all state and locally administered residential facilities for juvenile offenders in the United States. For this data collection, a juvenile is a person subject to the exercise of the juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by state law. A person who was of juvenile age at the time of admittance is still considered a juvenile even though retained beyond the juvenile age up to the maximum retention authority set by law. A person is still considered a juvenile even though tried as an adult in criminal court. An adult criminal offender, sometimes held in juvenile facilities, is a person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutorily specified age.

The mailing list used for the census was derived from the National Criminal Justice Agency List, which is maintained by the Census Bureau for the Bureau of Justice Statistics and is updated prior to each census. The update for the 1985 Public Juvenile Facility Census was done by mailing out names and addresses of facilities to state administrators and asking them to review, correct, and return them; reviewing the American Correctional Association publication of Juvenile and Adult Correctional Institutions, State Comprehensive Law Enforcement Plans and Annual State Reports.

The data reflect juvenile facilities operating on February 1, 1986. Information on population movement, length of stay, average daily population and expenditures is for the calendar year 1984, unless otherwise indicated by the respondent. If reporting periods were different they were asked to report on a fiscal year that ended during the calendar year 1984.

This census was conducted by mail. Questionnaires were mailed in February 1985. A CJ-17 Form was used for the first mailout. A second request followed by telephone calls was used for non-respondents. Data for 1,040 juvenile residential facilities was collected for all states and the District of Columbia (except Vermont, which had no publically operated facilities). The census produced a 100% response rate.

If exact data were not available for the census period an accurate estimate was given by the respondent. Also, if a facility failed to respond to the census questionnaire, they were contacted by phone. Data received by phone often represented the date of the phone contact, however, this amounted to less than 5% of the total universe, most of which had small capacities.

DEFINITIONS

Crimes against persons

Murder - Willful killing of one human being by another.

Forcible rape - Carnal knowledge of a female forcibly and against her will.

Robbery - Taking anything of value from the care, custody, or control of a person or persons by force or threat of force. Include purse snatching.

Aggravated assault - Unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury.

Nonnegligent manslaughter - Willful killing of a human being by another without malice.

Negligent manslaughter - Killing of a human being by another due to negligence.

Simple assault - Assaults or attempted assaults where no weapon was used or which did not result in serious bodily injury.

Sexual assault - Statutory rape, lewd act against child, other sexual assault.

Crimes against property

Burglary - unlawful entry of a structure to commit a felony or a theft.

Arson - Willful or malicious burning or attempt to burn a dwelling house, public building, motor vehicle, aircraft, personal property of another, etc.

Larceny/theft - Unlawful taking of property from the possession of another. Includes: shoplifting, bicycles,

automobile accessories, or any property or article which is not taken by force, violence, or fraud.

Motor vehicle theft - Theft or attempted theft of a motor vehicle.

Vandalism - Willful or malicious destruction of property, without consent of the owner or persons having custody or control.

Forgery, counterfeiting - Making, altering, or possessing, with intent to defraud, anything false which is made to appear true.

Fraud - Obtaining money or property by false pretension.

Stolen property - Buying, receiving, possessing of stolen property.

SAMPLING INFORMATION

Facilities surveyed held juveniles under commitment for treatment, detention pending court action and/or voluntary placements. Specifically excluded were privately operated facilities holding juveniles for similar reasons.

FILE STRUCTURE

The JUVENILE DETENTION AND CORRECTIONAL FACILITY CENSUS, 1985 is available from the ICPSR in two formats: card image and OSIRIS. The card image file contains several decks per case in a format based on 80 column punched cards. The data are sorted by case with all decks for a case together in ascending order.

The OSIRIS dictionary gives the format and other information for each variable in the OSIRIS data file. The dictionary or dictionary-codebook file is used in conjunction with the OSIRIS software package. The OSIRIS data file is constructed with a single logical record for each case. There are 279 variables with 1,040 cases.

The OSIRIS data file can be accessed directly through software packages or programs which do not use the OSIRIS dictionary by specifying the tape locations of the desired variables. These tape locations are given in the OSIRIS dictionary-codebook.

CODEBOOK INFORMATION

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

- [1] Indicates the variable and reference numbers.
A variable number and a reference number are assigned to each variable in the data collection. In the present codebook which documents the archived data collection these numbers are identical. Should the data be subsetted or rearranged by an OSIRIS program (e.g., MMP to intersperse data from another source, or TCOT to produce an analysis deck), the variable numbers would change to reflect the order of the new data collection, while the reference number would remain unchanged to reflect the variable number in the codebook describing the archived data collection.
- [2] Indicates the abbreviated variable name (maximum of 24 characters) used in the OSIRIS system to identify the variable for the user. An expanded version of the variable name can be found in the variable description list.

- [3] Indicates the code values of missing data. In this example, there are NO MISSING DATA CODES. Some analysis software packages (including the OSIRIS software package) require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- [4] Indicates the starting location and width of this variable when the data are stored on a magnetic tape in the OSIRIS format. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "FACILITY TYPE" is 1 column(s) wide and is located in the 137th column within the record.
- [5] Indicates the location by deck and column(s) of this variable when the data are stored on cards or in card-image format (80-column format)
- [6] This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [7] Indicates an additional comment or explanation appended to the variable description.
- [8] Indicates the code values occurring in the data for this variable.
- [9] Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Do Not Know), "NA" (Not Ascertainable), and "INAP" (Inappropriate).

ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to OSIRIS missing data values. No consistency checks were performed. Statements bracketed in "<" and ">" signs in the body of the codebook were added by the processors for explanatory purposes.

1985 CENSUS OF PUBLIC JUVENILE DETENTION, CORRECTIONAL, AND SHELTER FACILITIES

RETURN TO

Bureau of the Census
ATTN: Governments Division
Washington, D.C. 20233

FROM THE DIRECTOR
BUREAU OF THE CENSUS

On behalf of the Department of Justice, the Bureau of the Census is conducting its periodic census of publicly administered juvenile facilities.

The data will be used for program development under the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, and the improvement of assistance to those concerned with juvenile problems. The census findings have been published since 1971 in a report series, "Children in Custody."

In order to complete data collection as soon as possible and permit early publication of census results, we will appreciate a prompt response, preferably within 3 weeks. If there are any items on the questionnaire for which answers cannot be readily obtained from available records, please provide reasonable estimates and indicate them with an asterisk (*). If we can be help in completing the questionnaire, please call Arthur Ciampa at (301) 763-7825.

The census is authorized by the 1974 Juvenile Justice and Delinquency Prevention Act as amended (42 USC 5852-53). While you are not legally required to respond, your participation is needed to make the results of the census comprehensive, accurate, and timely.

Sincerely,

John G. Keane

**DO NOT COMPLETE THE QUESTIONNAIRE FOR MORE THAN ONE FACILITY.
IF MORE QUESTIONNAIRES ARE NEEDED, CALL COLLECT AT (301) 783-7825.**

Section I - EXCLUSIONS

If this facility falls into any of the following categories, you need NOT complete the remainder of the questionnaire. Simply mark (X) the appropriate box and return the questionnaire in the enclosed envelope.

- This facility operates only a nonresidential community program — the juveniles receive counseling or educational services from this facility but do not stay here overnight.
- This is a foster home for fewer than 3 juveniles

Section II - DEFINITIONS

Juvenile — A person subject to the exercise of juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by State law.

For the purposes of this report, a person who was of juvenile age at the time of admittance is still considered a juvenile even though retained beyond the juvenile age up to the maximum retention authority set by law.

For the purposes of this report, a person of juvenile age is still considered a juvenile even though tried as an adult in criminal court.

Adult criminal offender — A person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutorily specified age.

For purposes of this report youthful offenders should be considered adults. A youthful offender is a person adjudicated in criminal court, who may be above the statutory age limit for juveniles but below a specified upper age limit and for whom special correctional commitments and special record-sealing procedures are made available by statute.

Committed or commitment — Refers to placement of juvenile offenders following adjudication and any placement procedure. May be referred to as "placement."

Detained or detention — Refers to juveniles who are pending adjudication or who have been adjudicated but are awaiting disposition or placement. Include those juveniles undergoing diagnosis or classification before disposition or placement.

Section III - ADULTS HELD
