Office of Juvenile Justice and Delinquency Prevention
JUVENILE DETENTION AND CORRECTIONAL FACILITY CENSUS, 1985 (ICPSR
8495)

SUMMARY: This survey provides information on the characteristics and administration of juvenile detention and correctional facilities. Six types of facilities are covered: (1) detention centers, (2) shelters, (3) reception or diagnostic centers, (4) training schools, (5) ranches, forestry camps, and farms, and (6) halfways houses and group homes. Survey items include facility capacity, number of full-time and part-time staff, number of admissions and discharges, average quarterly population, and expenditures by the facility. Data for facility residents include age, sex, and average length of stay. CLASS III

UNIVERSE: Residential facilities operated by state and local governments as juvenile detention and correctional facilities that were in operation at the time the census was initiated (February 1, 1984).

Purpose

A. Historical Development

The Public Juvenile Detention, Correctional and Shelter Facility Census is the eighth in a series of data collection efforts aimed at providing information on the number and type of juveniles placed in state and local residential facilities for juvenile offenders across the 50 states and the District of Columbia. The original census occurred in 1971 and supplanted the survey of Public Institutions for Delinquent Children conducted by the Department of Health, Education, and Welfare. The 1971 census covered 722 public detention and correction facilities and they were classified as either 1) detention centers; 2) shelters; 3) reception and diagnostic centers; 4) training schools; 5) ranches, forestry camps and farms; or 6) halfway houses and group homes. This classification system was based on responses to the questionnaire which asked the respondent to mark the type of facility most applicable. Multi-function facilities, such as training schools with detention or reception centers were classified according to the function having the largest capacity or resident population. This system has been used throughout the series of censuses. The survey questionnaire was substantially revised for the 1977 census to provide data that would better meet the programmatic, analytic, and evaluative needs arising from the Juvenile Justice and Delinquency Prevention Act (JJDP) of 1974. The data collected in that and the 1979 census provided a new facility classification framework to better measure the extent to which the Act has resulted in modification to the structure and function of the Nation's public juvenile custody facilities.

B. Justification

Under an interagency agreement, the Department of Justice contracts with the Bureau of the Census to conduct a biennial census of public juvenile detention, correctional and shelter facilities. The census provides information on the number and type of juveniles placed in residential facilities for juvenile offenders across the 50 states and the District of Columbia, and related statistics such as average length of stay, degree of security, capacity, detention statistics, age ranges, admissions and releases, type of offense and other facility characteristics such as annual expenditures.

C. Users/Uses of the Data

The census data are used by those concerned with juvenile justice - from planners and policymakers on a statewide level to individual practitioners such as case-workers, facility administrators, teachers, students, researchers and citizens groups. Recent users of the census data include the following:

Institute of Policy Analysis, Eugene, OR

Office of Social Responsibility, Arlington, VA

Juvenile Justice Assessment Center, American Justice Institute, Sacramento, CA

National Center for Juvenile Justice, Pittsburgh, PA

Office of Special Litigation, Department of Justice, National Institute of Justice, Washington, D.C.

Methodology

A. Census Coverage

The 1985 Public Juvenile Facility Census covered all state and locally administered residential facilities for juvenile offenders in the United States. For this data collection, a juvenile is a person subject to the exercise of the juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by state law. A person who was of juvenile age at the time of admittance is still considered a juvenile even though retained beyond the juvenile age up to the maximum retention authority set by law. A person is still considered a juvenile even though tried as an adult in criminal court. An adult criminal offender, sometimes held in juvenile facilities, is a person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutorily specified age.

Facilities surveyed held juveniles under commitment for treatment, detention pending court action and/or voluntary placements. Specifically excluded were privately operated facilities holding juveniles for similar reasons.

The mailing list used for the census was derived from the National Criminal Justice Agency List, which is maintained by the Census Bureau for the Bureau of Justice Statistics and is updated prior to each census. The update for the 1985 Public Juvenile Facility Census was done by mailing out names and addresses of facilities to state administrators and asking them to review, correct, and return them; reviewing the American Correctional Association publication of Juvenile and Adult Correctional Institutions, State Comprehensive Law Enforcement Plans and Annual State Reports.

B. Census Period

The data reflect juvenile facilities operating on February 1, 1986. Information on population movement, length of stay, average daily population and expenditures is for the calendar year 1984, unless otherwise indicated by the respondent. If reporting periods were different they were asked to report on a fiscal year that ended during the calendar year 1984.

C. Data Collection

This census was conducted by mail. Questionnaires were mailed in February 1985. A CJ-17 Form was used for the first mailout. A second request followed by telephone calls was used for non-respondents. Data for 1,040 juvenile residential facilities was collected for all states and the District of Columbia (except Vermont, which had no publically operated facilities). The census produced a 100% response rate. Questionnaires were subjected to a strict manual clerical edit comparing consistency with the previous census questionnaire for each facility. After data keying, data was also subjected to a computer edit to identify mathematical or consistency errors during the keying process.

D. Data Limitations

If exact data were not available for the census period an accurate estimate was given by the respondent. Also, if a facility failed to respond to the census questionnaire, they were contacted by phone. Data received by phone often represented the date of the phone contact, however, this amounted to less than 5% of the total universe, most of which had small capacities.

A second limitation is that expenditures are not often available by facility in multi-facility counties. Thus total expenditures had to be broken out by rated capacity and posted accordingly.

E. Special Coding

Each facility questionnaire had an assigned unique identification number based on state and county location. This identification number was updated according to the present facility characteristics. The coding system used was that for the Juvenile Correctional Identification System. (Description attached).

Governments Division has developed a generalized routine to process criminal justice data. The 1985 Census of Public (and Private) Juvenile Facilities is the first census to utilize the new procedure. Data for any one form is keyed according to two formats. Identifying information is keyed into the first 120 characters of the record. Starting with the first data item coded binary word # 31 to agree with the internal record layout, each item is keyed into a 10 character field, right justified and zero filled. Blanks and zero entries are filled with 10 0's. Occassionally the coded numbers may have gaps. This is the result of some data items appearing on one form but not on the other. Each form will (in this case the public form) have 10 character fields that are 0 filled for those particular gaps. The data was transmitted after keying in ASCII in groups of 120 character records.

Special attention should be paid to variables on the file that did not appear on the queestionnaire, but have been computed and inserted into the file. The following is a summary of these variables and their location on the record.

1985 CENSUS OF PUBLIC JUVENILE DETENTION, CORRECTIONAL, AND SHELTER FACILITIES

RETURN TO

Bureau of the Census
ATTN: Governments Division
Washington, D.C. 20233

FROM THE DIRECTOR
BUREAU OF THE CENSUS

On behalf of the Department of Justice, the Bureau of the Census is conducting its periodic census of publicly administered juvenile facilities.

The data will be used for program development under the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, and the improvement of assistance to those concerned with juvenile problems. The census findings have been published since 1971 in a report series, "Children in Custody."

In order to complete data collection as soon as possible and permit early publication of census results, we will appreciate a prompt response, preferably within 3 weeks. If there are any items on the questionnaire for which answers cannot be readily obtained from available records, please provide reasonable estimates and indicate them with an asterisk (*). If we can be help in completing the questionnaire, please call Arthur Ciampa at (301) 763-7825.

The census is authorized by the 1974 Juvenile Justice and Delinquency Prevention Act as amended (42 USC 5652-53). While you are not legally required to respond, your participation is needed to make the results of the census comprehensive, accurate, and timely.

Sincerely,

JOHN G. KEANE

IF MORE QUESTIONNAIRES ARE NEEDED, CALL COLLECT AT (301) 763-7825.**

Section I — EXCLUSIONS

If this facility falls into any of the following categories, you need NOT complete the remainder of the questionnaire. Simply mark (X) the appropriate box and return the questionnaire in the enclosed envelope.

- This facility operates only a nonresidential community program — the juveniles receive counseling or educational services from this facility but do not stay here overnight.
- This is a foster home for fewer than 3 juveniles

Section II — DEFINITIONS

Juvenile — A person subject to the exercise of juvenile court jurisdiction for purposes of adjudication and treatment based on age and offense limitations as defined by State law.

For the purposes of this report, a person who was of juvenile age at the time of admittance is still considered a juvenile even though retained beyond the juvenile age up to the maximum retention authority set by law.

For the purposes of this report, a person of juvenile age is still considered a juvenile even though tried as an adult in criminal court.

Adult criminal offender — A person subject to the original jurisdiction of the criminal court rather than the juvenile court because at the time of the offense the person was above a statutorily specified age.

For purposes of this report **youthful offenders** should be considered adults. A **youthful offender** is a person adjudicated in criminal court, who may be above the statutory age limit for juveniles but below a specified upper age limit and for whom special correctional commitments and special record-sealing procedures are made available by statute.

Committed or commitment — Refers to placement of juvenile offenders following adjudication and any placement procedure. May be referred to as "placement."

Detained or detention — Refers to juveniles who are pending adjudication or who have been adjudicated but are awaiting disposition or placement. Include those juveniles undergoing diagnosis or classification before disposition or placement.

Section III — ADULTS HELD

Juvenile Correctional Identification System for
1985 Public Juvenile Facility Census

Each facility is identified by a 17 digit identification code (preceded by the form type - 017). The old 7 digit agency ID code follows the updated one on the record.

Digit 1 & 2 - Identifies the State the facility is in, States are listed alphabetically (including District of Columbia), then numbered 01-51. "01" is Alabama, "02" is Alaska, etc.

Digit 3 - Identifies the type of administration.

- 0 = facility operated by a State
- 1 = facility operated by a County
- 2 = facility operated by a City

Digit 4, 5, & 6 - Identifies the county the facility is physically located in. Counties within a State are ordered alphabetically and assigned a unique number. Thus, a facility in Anderson County, Texas is "001" in these 3 digits, as is one in Adams County, Pennsylvania, etc.

Digit 7, 8, & 9 - Identifies the city or county that operates the facility. (All State agencies are coded "000" in these 3 digits). Cities within a county are ordered alphabetically, then assigned a unique number. If a facility is county operated, the county in digits 4, 5, 6 is repeated here.

Digit 10 - 10th digit is a check for accuracy of preceding code.

Digit 11 - Always a '5', standing for juvenile detention or correction facilities.

Digit 12 - Type of facility, self classification, according to the following:

- 0 - Detention center
- 1 - Shelter
- 2 - Reception or diagnostic center
- 3 - Training school
- 5 - Ranch, forestry camp or farm
- 6 - Halfway house or group home

Digit 13 & 14 - Assigns a consecutive unique number to each agency beginning with '01' according to county location.

Digit 15 - Sex of residents housed, according to the following:

- 0 - Unknown
- 1 - Juveniles, males only
- 2 - Juveniles, females only
- 3 - Juveniles, males and females

Digit 16 - Number of employees, according to the following:

- 0 - Unknown or no employees
- 1 - Indicates 1 full-time and part-time payroll employee
- 2 - Indicates 2-4 full-time and part-time payroll employees
- 3 - Indicates 5-9 full-time and part-time payroll employees
- 4 - Indicates 10-24 full-time and part-time payroll employees
- 5 - Indicates 25-49 full-time and part-time payroll employees
- 6 - Indicates 50-99 full-time and part-time payroll employees
- 7 - Indicates 100-199 full-time and part-time payroll employees
- 8 - Indicates 200-299 full-time and part-time payroll employees
- 9 - Indicates 300 or more full-time and part-time payroll employees

Digit 17 - Average daily population for calendar year 1984 according to the following:

- 0 - Unknown or no residents
- 1 - Indicates 1-9 residents
- 2 - Indicates 10-24 residents
- 3 - Indicates 25-49 residents
- 4 - Indicates 50-74 residents
- 5 - Indicates 75-99 residents
- 6 - Indicates 100-199 residents
- 7 - Indicates 200+ residents

DATA MAP FOR STUDY NUMBER 8495

THE FOLLOWING IS A LIST OF ABBREVIATIONS THE USER MAY ENCOUNTER IN THIS FILE:

COL = COLUMN LOCATION FOR CARD-IMAGE DATA.

LOC = LOCATION FOR OSIRIS OR LOGICAL RECORD LENGTH DATA.

NDEC = NUMBER OF DECIMAL DIGITS.
(THIS IS OMITTED IF THERE ARE NO DECIMAL DIGITS.)

DK = DECK (REFERS TO DECK NUMBER IN CARD-IMAGE DATA.
FOR LOGICAL LENGTH DATA, DECK NUMBER IS ALWAYS ONE.)

MD = MISSING DATA CODE.

VAR = VARIABLE NUMBER.

REF = REFERENCE NUMBER; NORMALLY THE SAME AS VARIABLE NUMBER.

WIDTH = FIELD WIDTH OF THE VARIABLE.

DECK IDENTIFICATION NUMBER IS '01'
