Selected findings

Thirty percent of all locally administered jails in the U.S. were located in the North Central region.

Jails in the North Central region held 18 percent of the total jail population on February 15, 1978 (table B).

Jail capacity in the North Central region was 20 percent of the total in the Nation and was expected to increase 8 percent between 1978 and 1980 (table C).

The ratio of inmates to total employees (full-time and part-time) in this region was 1.6 to 1; the ratio of inmates to custodial personnel was 3.4 to 1 (table E).

Two-thirds of the jails in the North Central region reported giving inmates a health interview or screening upon admission (table F).

Introduction

This report presents data from the 1978 National Jail Census for the jails in the North Central region. It is one in a series of four reports on local jails. The other three reports are for the Northeast, South, and West regions.

The 1978 National Jail Census and the companion Survey of Inmates of Local Jails were conducted for the Bureau of Justice Statistics by the Bureau of the Census. Summary results of these two surveys were published in a preliminary report released in February 1979. Additional data from the 1978 National Jail Census will be published in subsequent reports. Data from the 1978 Survey of Jail Inmates is presented in the report *Profile of Jail Inmates*.

Organization of this report

This report is designed as a ready reference for data for individual local jails in the U.S. during 1978, specifically the North Central region. The text begins with an overview of the 1978 National Jail Census and the Survey of Inmates of Local Jails and their historical development.

The general overview is followed by a summary of findings of all local jails in the Nation, highlighting findings for the jails in the North Central region. The methodology section documents the survey coverage, survey period, data collection, data limitations, and definitions. In addition, information on how to obtain the local jail listing is included.

The final section is comprised of eight tables presenting facility characteristics data for each of the individual jails in the North-Central region:

- Table 1 presents data on the jail's retention authority, the average inmate population, and the number of inmates on February 15, 1978, by detention status;
- Table 2, the design/rated capacity, the number and average floor space of various size confinement units, and age of jail and planned changes by 1982;
- Table 3, the number of jail employees by occupation category and full-time or part-time status;
- Table 4, medical services;
- Table 5, work-release and weekend sentence programs;
- Table 6, the number of inmates held for other authorities;
- Table 7, drug- and alcohol-related services for the 107 jails with an average daily population of 50 or more inmates; and
- Table 8 lists the jails reporting inmate deaths during calendar year 1977, the number of inmates who died, and the cause of death.

or acquire a new jail before December 31, 1982. Appendix C exhibits the two questionnaires used in the 1978 National Jail Census.

Historical development

1970 Jail Census

The 1970 and 1972 efforts laid a strong foundation for the 1978 National Jail Census and its companion Survey of Inmates of Local Jails. In addition to updating the basic facility data collected in 1970 and 1972, the 1978 census obtained for the first time detailed data on the confinement units in the Nation's jails. For each jail, information was collected on the number of cells, rooms, dormitories or other units where inmates spend the night, reported by design size (designed for 1, 2, 3 to 4, or 5 or more inmates); the average floor space of one unit of each size; and the total number of inmates assigned to all units of each size on the census day. These data were collected in response to a congressional mandate for an assessment of the Nation's correctional system. Similar data were obtained for State prisons and community facilities during the 1979 Census of State Correctional Facilities, also conducted by the Bureau of the Census for the Bureau of Justice Statistics. Together, these two data sets provide for the first time a comprehensive inventory of confinement space in the Nation's State and local adult correctional facilities.

Information was also obtained for all jails on the composition of the inmate population by type of retention, by sex and by whether adult or juvenile; design capacity; retention authority; age of institution; and employment and expenditure data. Additional information for all county jails and jails in cities of 25,000 population or greater was collected on the age of the cells and the presence of recreational, educational, medical, and visiting facilities.

The 1978 census also obtained considerable information on the availability of medical facilities and services, including admission health screenings, admission physical examinations, medical facilities and medical personnel within the jail, number of inmates receiving prescription medication, and number of inmate deaths during calendar year 1977 by cause of death.

1972 Jail Census

Another jail census in 1972 was conducted in conjunction with the first survey of jail inmates. The 1972 census obtained additional information on the types and characteristics of jail employees; the availability of medical facilities, recreational facilities, federally funded manpower and training programs, and various counseling and treatment programs; and the extent of participation in work-release, weekend sentence, and pre-trial intervention programs. The facility data from the 1972 census were published in *The Nation's Jails**, and the inmate data in *Survey of Jail Inmates, 1972: Advance Report**.

Number of jail inmates

Jails in the North Central region held 18 percent of the total jail population on February 15, 1978 (Table B). As in the other three regions, the jail population was predominantly adult male (92 percent). The North Central region had the highest proportion of juveniles among its jail population (2 percent).

Bed capacity

Jails in the North Central region had 20 percent of the total jail bed capacity and reported an anticipated net increase of 8 percent in the number of beds between 1978 and 1980 (Table C). This was the largest expected increase of all four regions; however, none of the net changes will be large enough to affect each region's relative share of the total bed capacity.

Number of beds by size of unit

Beds in general-purpose confinement units in the North Central region were fairly evenly distributed among the various size units (Table D).

Jail employment

The North Central region had 25 percent of the jail employees compared with 18 percent of the jail population (Table E). The ratio of inmates to total employees (full-time and part-time) in this region was 1.6 to 1—the lowest among the regions. However, the number of employees reflects a large proportion of part-time administrators (sheriffs and deputies who perform law enforcement or judicial duties in addition to serving the jail); almost one-third of the employees were administrative, and more than 80 percent of these were part-time. The ratio of inmates to custodial personnel was 3.4 to 1 in the North Central region—the second lowest among the regions.

Health assessment for jail admissions

Two-thirds of the jails in the North Central region reported giving inmates a health interview or screening upon admission (Table F). This was consistent with the percentages in the South and West but below that reported in the Northeast. Less than 5 percent of the jails in the North Central region reported administering a medical physical examination as part of the admission procedure.

Inmates held because of overcrowding

A small portion of the jail population in the North Central region (3 percent) consisted of inmates held because of overcrowding elsewhere (Table G). A majority of these (81 percent) were being held for other local jurisdictions.

Jail census methodology: Sources and limitations of the data

Coverage

The 1978 National Jail Census covered all locally administered jails in the Nation. In this census, a jail was defined as a confinement facility intended for adults but sometimes holding juveniles that holds persons detained pending adjudication and/or persons committed after adjudication, usually for sentences of a year or less. Specifically excluded from the census were drunk tanks, lock-ups, and similar "holding facilities" that do not hold persons after they have been formally charged. State-operated jail systems in Connecticut, Delaware, Hawaii, Rhode Island, and Vermont were also excluded, as were juvenile institutions, community-based prerelease facilities (halfway houses, work-release or study-release facilities, etc.), hospitals for the criminally insane, treatment facilities for drug addicts and/or alcoholics, and jails located in United States territories.

The mailing list used for the census was derived from the National Justice Agency List, which is maintained by the Census Bureau for the Bureau of Justice Statistics. This list was reviewed against the following sources:

- The 1978 edition of *American Correctional Association Directory of Juvenile and Adult Correctional Departments, Institutions, Agencies and Paroling Authorities*, and
- The 1978 State Comprehensive Law Enforcement Plans prepared by each State for the Law Enforcement Assistance Administration.

Survey period

This report reflects jails operating on February 15, 1978. Information on inmate deaths is for calendar 1977.

Data Collection

All data reflect State-by-State variation in legal codes and procedures governing a jail's retention authority and facility-by-facility variation in inmate classification and housing practices. Thus caution is required when making comparisons.

Definitions

Local jail. A confinement facility administered by a unit of local government (county or city) intended for adults but sometimes holding juveniles that holds persons detained pending adjudication and/or persons committed after adjudication, usually for sentences of a year or less. Temporary holding facilities ("lock-ups") that do not hold persons after they have been formally charged in court (usually within 48 hours of arrest) are excluded.

Adult. A person who is within the original jurisdiction of a criminal, rather than a juvenile, court because his or her age at the time of an alleged criminal act was above a statutorily specified limit.

Limitations

Because a complete census was conducted of all local jails meeting the selection criteria, the data are not subject to sampling error. The data are subject to response error, however. Such error was kept to a minimum through quality control checks. In this regard, it should be noted that for any items on the census questionnaire unobtainable from available records, reasonable estimates were requested.

The data reported in this publication do not reflect changes that have taken place since February 1978.

• **Special purpose units.** Units intended to meet specialized housing needs, e.g., an infirmary, trustee cells, isolation cells, etc. Special purpose units can include both units with beds and those without beds, e.g., "drunk tanks," "bull-pens," etc.

Bed capacity. The number of beds in a jail calculated by multiplying the number of confinement units of each design size (e.g., 1, 2, 3, 4, or 5 or more persons) by its design size and summing the results for all size categories. Includes beds in general purpose units and special purpose units with beds.

Jail employees. All payroll and nonpayroll personnel who work at a jail full-time or part-time.

• **Full-time personnel.** Personnel who work full-time at the jail.

• **Part-time personnel.** Personnel who work part-time at the jail including full-time employees who perform other duties in addition to those at the jail. Jail employees are further categorized as:

• **Administrative.** Chief jailer (or sheriff or chief of police), deputies, and/or assistants who work at the jail in an administrative capacity.

• **Custodial officers.** Guards, jailers, etc. who supervise the inmate population.

• **Clerical and maintenance personnel.** Typists, secretaries, janitors, cooks, ground-keepers, etc.

• **Service personnel.** Teachers, social workers, counselors, psychologists, doctors, and other medical personnel, etc. who provide professional services to the inmates.

• **Other.** Personnel who can not be classified as one of the above.

• **Health interview/screening.** An initial assessment of an inmate's health from observation and medically related questions, made at the time of admission.

• **Medical physical examination.** A health assessment based on medical tests such as

taking blood pressure, blood or urine samples, chest x-ray, eye and ear examination, etc.

FROM THE DIRECTOR
BUREAU OF THE CENSUS

The Bureau of the Census is conducting a special census of the Nation's jails for the Law Enforcement Assistance Administration (LEAA) of the U.S. Department of Justice. The census of jail facilities, along with a survey of inmates in selected jails, is being undertaken at the direction of the Congress. The purpose of the census is to determine existing and future needs in correctional facilities in the Nation and the adequacy of Federal, State, and local programs to meet such needs.

Your cooperation in completing the questionnaire will be appreciated. If there are any items on the questionnaire for which the answer cannot be obtained from available records, reasonable estimates are requested. Simply indicate these estimates with an asterisk (*).
