

This report was prepared by SEARCH, The National Consortium for Justice Information and Statistics, using federal funding provided by the Bureau of Justice Statistics.

Document Title: Survey of State Criminal History Information Systems, 2020

Authors: Becki R. Goggins, SEARCH
Dennis A. DeBacco, SEARCH

BJS Project Manager: Devon B. Adams, BJS

Document No.: NCJ 305602

Publication Date: December 2022

Award No.: This project was supported by award number 2019-RU-BX-K001.

Abstract:

This is the 16th survey of criminal history information systems conducted for BJS by SEARCH, The National Consortium for Justice Information and Statistics, since 1989. This report is based on the results from a survey conducted of the administrators of the state criminal history record repositories. It presents data on the functions and status of state criminal history files as of December 31, 2020.

Disclaimer

The Bureau of Justice Statistics funded this third-party report. It is not a BJS report and does not release official government statistics. The report is released to help inform interested parties of the research or analysis contained within and to encourage discussion. BJS has performed a limited review of the report to ensure the general accuracy of information and adherence to confidentiality and disclosure standards. Any statistics included in this report are not official BJS statistics unless they have been previously published in a BJS report. Any analysis, conclusions, or opinions expressed herein are those of the authors and do not necessarily represent the views, opinions, or policies of the Bureau of Justice Statistics or the U.S. Department of Justice.

Acknowledgments. This report was prepared by SEARCH Group, Incorporated, dba SEARCH, The National Consortium for Justice Information and Statistics, Jason Bright, Chair, and David J. Roberts, Executive Director. The project director was Becki R. Goggins, Director, Law and Policy. Ms. Goggins and Dennis A. DeBacco, Justice Information Services Specialist, Law and Policy, authored the report. Mr. DeBacco conducted the survey and compiled the results. Editorial support was provided by Karen Lissy, Justice Information Services Specialist, Twyla R. Putt, Corporate Communications Specialist, and Christine E. Lee, Webmaster. This project was supported by Cooperative Agreement No. 2019-RU-BX-K001 awarded by the Bureau of Justice Statistics (BJS), Office of Justice Programs (OJP), U.S. Department of Justice (USDOJ) to SEARCH, The National Consortium for Justice Information and Statistics, 1900 Point West Way, Suite 161, Sacramento, California 95815. The Federal project monitor was Devon B. Adams, Deputy Director, Policy Division, BJS. Points of view in this document are those of the authors and do not necessarily represent the official position or policies of the U.S. Department of Justice.

Glossary of terms

Automated fingerprint identification system (AFIS): An automated system for searching fingerprint files and transmitting fingerprint images. AFIS computer equipment can scan fingerprint impressions (or use electronically transmitted fingerprint images) and automatically extract and digitize ridge details and other identifying characteristics in sufficient detail to enable the computer's searching and matching components to distinguish a single fingerprint from thousands or even millions of fingerprints previously scanned and stored in digital form in the computer's memory. The process eliminates the manual searching of fingerprint files and increases the speed and accuracy of ten-print processing (arrest fingerprint cards and noncriminal justice applicant fingerprint cards).

AFIS equipment also can be used to identify individuals from "latent" (crime scene) fingerprints, even fragmentary prints of single fingers in some cases.

Criminal history record information (CHRI) or criminal history record information system: A record (or the system maintaining such records) that includes individual identifiers and describes an individual's arrests and subsequent dispositions. Criminal history records do not include intelligence or investigative data or sociological data such as drug use history.

CHRI systems usually include information on juveniles if they are tried as adults in criminal courts. Most, however, do not include data describing involvement of an individual in the juvenile justice system. Data in CHRI systems are usually backed by fingerprints of the record subjects to provide positive identification. State legislation and

practices vary widely concerning disclosure of juvenile record information and access to criminal history records for noncriminal justice purposes.

Data quality: The extent to which criminal history records are complete, accurate, and timely. In addition, accessibility sometimes is considered a data quality factor. The key concern in data quality is the completeness of records and the extent to which records include dispositions, as well as arrest and charge information. Other concerns include the timeliness of data reporting to state and Federal repositories, the timeliness of data entry by the repositories, the readability of criminal history records, and the ability to have access to the records when necessary.

Interstate Identification Index (III): A fingerprint-supported "index-pointer" system for the interstate exchange of criminal history records. Under III, the Federal Bureau of Investigation (FBI) maintains an identification index of persons arrested for felony and reportable misdemeanor offenses under state or Federal law. The index includes identification information (such as name, date of birth, race, and sex), Universal Control Numbers (UCN), and State Identification Numbers (SID) from each state that holds information about an individual.

Search inquiries from criminal justice agencies nationwide are transmitted automatically via state telecommunications networks and the FBI's Criminal Justice Information Services Division (CJIS) Wide Area Network (WAN). Searches are made on the basis of name and other identifiers. The process is entirely automated. If a hit is made against the Index, record requests are made using the SID or UCN, and data are automatically retrieved from each repository holding records on the individual and

forwarded to the requesting agency via the International Justice and Public Safety Network (Nlets), which is administered by the states and is located in Phoenix, AZ. Currently, all 50 states and the District of Columbia participate in III. Responses are provided from FBI files when a jurisdiction, such as a U.S. territory, is not a participant in III. The III system may also be employed when responding to fingerprint-based noncriminal justice purpose record background checks.

Participation in III requires that a state maintain an automated criminal history record system capable of interfacing with the III system and also capable of responding automatically to all interstate and Federal/state record requests.

Juvenile justice records: Official records of juvenile justice adjudications. Most adult criminal history record systems do not accept such records, which are frequently not supported by fingerprints, and which usually are confidential under state law. The FBI accepts and disseminates juvenile records when the subject charged is being treated and processed as an adult through the criminal justice process. States, however, are not required to submit such records to the FBI and may be legislatively prohibited from doing so.

Lights-out processing: “Lights-out” criminal record processing occurs when fingerprint data submitted to a criminal record repository by a local justice jurisdiction to determine an individual’s identity, and frequently associated criminal history record information, is processed electronically and a response is returned electronically to the submitting jurisdiction, all without human intervention.

Livescan: The term “livescan” refers to both the technique and technology used to electronically capture fingerprint and palm print images from individuals without the need for the more traditional ink-and-paper methods. Livescan devices also allow the electronic transfer of digitized images and accompanying textual information to a criminal history repository.

Cardscan: The term “cardscan” refers to both the technique and technology used to electronically capture and digitize fingerprints that have been recorded using traditional ink-and-paper methods. Scanning these images and digitizing these fingerprint impressions enables them to be searched and maintained electronically using AFIS.

National Crime Information Center

(NCIC): A computerized information system available to law enforcement and criminal justice agencies maintained by the FBI. The system includes records for wanted persons, missing persons, other persons who pose a threat to officer and public safety, and various property files. The III is accessible through the NCIC system. The NCIC operates under a shared-management concept between the FBI and local, state, tribal, and Federal criminal justice agencies. The FBI maintains the host computer and provides a telecommunications network to the Criminal Justice Information Services Systems Agency (CSA) in each of the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and Canada, as well as Federal criminal justice agencies. A CSA is a criminal justice agency that has overall responsibility for the administration and usage of NCIC within a district, state, territory, or Federal agency. NCIC data may be provided only for criminal justice and other specifically authorized purposes.

National Crime Prevention and Privacy Compact: An interstate and Federal/state compact that establishes formal procedures and governance structures for the use of the III. It is designed to facilitate the exchange of criminal history data among states for noncriminal justice purposes and to eliminate the need for the FBI to maintain duplicate data about state offenders. Under the Compact, the operation of this system is overseen by a policymaking council comprised of state and Federal officials.

The key concept underlying the Compact is agreement among all signatory states that all criminal history information (except sealed records) will be provided in response to noncriminal justice requests from another state—regardless of whether the information being requested would be permitted to be disseminated for a similar noncriminal justice purpose within the state holding the data. (That is, the law of the state that is *inquiring* about the data—rather than the law of the state that *originated* the data—governs its use.) In some cases, ratification of the Compact will have the effect of amending existing state legislation governing interstate record dissemination, since most states do not currently authorize dissemination to all the Federal agencies and out-of-state users authorized under the Compact. Noncriminal justice inquiries sent to the FBI are handled by a combination of information retrieval by the FBI from its files of voluntarily contributed state arrest and disposition records and by accessing state-held information. This requires that the FBI maintain duplicates of state records (see National Fingerprint File discussion for exception) and generally results in less-complete records being provided, since FBI files of state records are not always as complete due to reporting deficiencies.

The Compact was passed by Congress and signed into law by President Clinton in October 1998. The Compact became effective in April 1999, following ratification by two state legislatures: Montana on April 8, 1999, and Georgia on April 28, 1999. As of July 2019, 32 additional states and the Federal Government have ratified the Compact:

- Nevada (May 1999);
- Florida (June 1999);
- Colorado (March 2000);
- Iowa (April 2000);
- Connecticut (June 2000);
- South Carolina (June 2000);
- Arkansas (February 2001);
- Kansas (April 2001);
- Alaska (May 2001);
- Oklahoma (May 2001);
- Maine (June 2001);
- New Jersey (January 2002);
- Minnesota (March 2002);
- Arizona (April 2002);
- Tennessee (May 2003);
- North Carolina (June 2003);
- New Hampshire (June 2003);
- Missouri (July 2003);
- Ohio (January 2004);
- Wyoming (February 2005);
- Idaho (March 2005);
- Maryland (May 2005);
- Oregon (July 2005);
- West Virginia (March 2006);
- Hawaii (May 2006);
- Michigan (January 2009);
- Vermont (July 2010);
- New York (March 2016);
- Virginia (July 2017);
- Utah (May 2018);
- Louisiana (August 2018); and
- Delaware (July 2019).

Eleven other states and territories have signed a Memorandum of Understanding (MOU) with the Compact Council indicating the state's

support of the Compact and the Council. An MOU signatory state agrees to voluntarily abide by the Compact and the Council's rules, procedures, and policies regarding the noncriminal justice use of the III without actually ratifying the Compact. These MOU states and territories include American Samoa, Guam, Puerto Rico, Illinois, Kentucky, Massachusetts, Mississippi, Nebraska, New Mexico, North Dakota, and South Dakota.

National Fingerprint File (NFF): A database of fingerprints, or other uniquely personal identifying information, relating to an arrested or charged individual maintained by the FBI to provide positive identification of record subjects indexed in the III system. The NFF contains fingerprints of Federal offenders and at least one set of fingerprints on state offenders from each state in which an offender has been arrested for a felony or reportable misdemeanor offense. Disposition data on the individual is also retained at the state repository and not forwarded to the FBI. Upon receipt of the first-arrest fingerprint card (or electronic images), the FBI enters the individual's fingerprint information, name, and identifiers in the III, together with a UCN and a SID for each state maintaining a record on the individual. Disposition information on state offenders is maintained only at the state level, and state repositories are required to electronically respond to all authorized record requests concerning these individuals for both criminal justice and noncriminal justice purposes. States are required to release all data on record subjects for noncriminal justice inquiries, regardless of whether the data could legally be released for similar purposes within the state. As of April 2022, the NFF has been implemented in 24 states: Colorado, Connecticut, Florida, Georgia, Hawaii, Idaho, Iowa, Kansas, Maryland, Michigan, Minnesota, Missouri, Montana,

New Jersey, New York, North Carolina, Ohio, Oklahoma, Oregon, Tennessee, Utah, Vermont, West Virginia, and Wyoming.

Next Generation Identification (NGI): The NGI system, developed over multiple years, replaced the FBI's Integrated Automated Fingerprint Identification System (IAFIS) and provides new functionality and enhanced capabilities. This technological upgrade accommodates increased information processing and sharing demands from local, state, tribal, Federal, and international agencies. The NGI system offers state-of-the-art biometric identification services and compiles core capabilities that serve as the platform for multimodal functionality.

Positive Identification: Identifying an individual using biometric characteristics that are unique and not subject to alteration. In present usage, the term refers to identification by fingerprints, but may also include identification by iris images, voiceprints, or other techniques. Positive identification is distinguished from identification using name, sex, date of birth, or other personal identifiers as shown on a document that could be subject to alteration or counterfeit, such as a birth certificate, Social Security card, or driver's license. Because individuals can have identical or similar names, ages, etc., identifications based on such characteristics are not reliable.

Rap back: A "rap back" or "hit notice" program will inform an employer or other designated entity when an individual who has undergone a fingerprint-based background check—and whose fingerprints are retained by a criminal history repository after the check—is subsequently arrested. Fingerprints obtained after the arrest are matched against a database that contains the fingerprints that were initially submitted. The employer or designated entity is then notified of the individual's arrest. There is a fee for the service in some states; other states

provide the service free. Some states also provide “rap back” services for notifications within the criminal justice system. For example, this might involve a notification to a parole or probation officer of the arrest of a person under supervision.

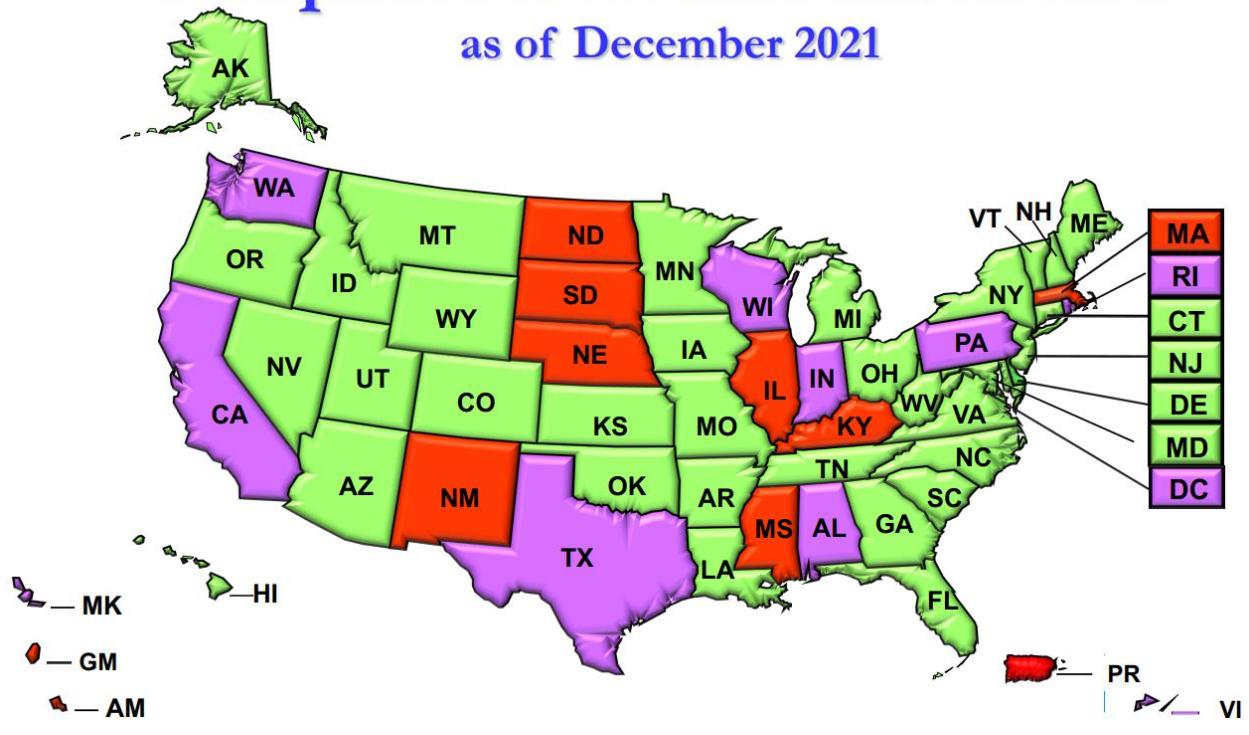

Rapid Identification (ID): Rapid ID devices are mobile fingerprint scanners that allow police officers, court personnel, and other criminal justice officials to positively identify subjects by scanning the subject’s fingerprint and searching it against a state and/or Federal database for a positive match.

State central repository: The database (or the agency housing the database) that maintains criminal history records on all state offenders. Records include fingerprint files and files containing identification segments and notations of arrests and dispositions. The central repository is generally responsible for state-level identification of arrestees. The repository agency often is the Criminal Justice Information Services Systems Agency (CSA) for contact with FBI record systems. Non-fingerprint-based inquiries from local agencies for a national records check are routed to the FBI via the central repository. Although usually housed in the Department of Public Safety, the central repository is maintained in some states by the State Police, Attorney General, or other state agency.

Note to readers

This is the 16th survey of criminal history information systems conducted by SEARCH, The National Consortium for Justice Information and Statistics, since 1989. Some of the tables include data from previous surveys. Use caution in drawing comparisons between the results of earlier surveys and the data reported here. Over the course of the survey years, the U.S. Department of Justice, Bureau of Justice Statistics (BJS), has continued to administer assistance programs dedicated to improving criminal history records. As a result, some states focused new or additional resources on the condition of their records and, in many cases, know more about their records today than in the past. Similarly, expansion, advancement, and adoption of technology have also made a beneficial impact. Some state repositories, however, have suffered fiscal cutbacks and consequently have had to shift priorities away from certain criminal history information management tasks. For these and other reasons, trend comparisons may not as accurately reflect the status of each state's criminal history records as the current data considered alone.

Survey revisions

Given dramatic advances in information technology, legislative and social trends that increase demand for criminal history record access, and the need for criminal record managers to respond to these developments, BJS and SEARCH conducted an in-depth review of the previous survey questions and developed a revised survey instrument for 2020.

SEARCH updated formats for easier response and collection of data and added new questions to collect information on new and emerging information sharing practices while deleting questions where sufficient information was obtained in previous surveys. Many of these changes were suggested by users and respondents during the review process.

Comments and suggestions focused on:

- Business process time measurements on arrest and supporting fingerprint records, protection orders, wanted persons, and disposition information that is received and processed by state repositories.
- File and database management of removing records upon receiving a “death notification” from an authorized source, or upon a subject reaching a predetermined age without having any new/current derogatory information posted to their criminal history record.
- Availability and use of computerized criminal history (CCH) record performance reporting tools (dashboards, reports, etc.) that enable states to regularly monitor submissions of information by contributing agencies (law enforcement, courts, prosecutors, and correctional facilities).
- Record sealing and expungement practices, statutory requirements, frequency, number of requests received, approved, or denied, and availability for subsequent limited use.

SEARCH continues to use an online database system to collect more complete and comprehensive survey data. Features include password-protected reporting forms that allow respondents to complete and submit individual sections of the survey, as well as to examine/update previously submitted portions.

The *Survey of State Criminal History Information Systems, 2020* consists of 40 data tables of information and reflects the evolving criminal record management environment.

Introduction

This report is based on the results from a survey conducted of the administrators of the state criminal history record repositories in May–July 2021. SEARCH surveyed 56 jurisdictions, including the 50 states, the District of Columbia, American Samoa, the Territory of Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands.¹ All 50 states, the District of Columbia, and Guam submitted survey responses. This report presents a snapshot as of December 31, 2020.

Throughout this report, the 50 states are referred to as “states”; the District of Columbia, American Samoa, Guam, Puerto Rico, the Northern Mariana Islands, and the Virgin Islands are referred to as “territories,” and “nation” refers collectively to both states and territories.

In addition, the Federal Bureau of Investigation (FBI) was the source for some of the information relating to criminal history records, including state participation in the Interstate

Identification Index (III) system (the national criminal records exchange system) and the number of III records maintained by the FBI on behalf of the states; the number of records in the wanted persons file; and the protection order file of the FBI’s National Crime Information Center (NCIC) database.

Major findings

Criminal history files

Overview of state criminal history record systems, December 31, 2020 (table 1):

- Fifty states, the District of Columbia, and Guam report the total number of persons in their criminal history files as 114,376,500, of which over 95% are automated records. (Readers should note that an individual offender may have records in more than one state and that records of deceased persons may be included in the counts provided by states. This means the number of living persons in the United States with criminal history records is unknown but is less than the total number of

subjects in state criminal history files.)

- Twenty-nine states, the District of Columbia, and Guam have fully automated criminal history files.

Level of disposition reporting

When calculating the percentage of arrests with final dispositions recorded, some states consider an arrest to have a disposition if **any** final disposition can be associated with an arrest cycle. This is commonly referred to as “cycle matching.” Other states do not consider an arrest to have a final disposition until **all** arrest charges are linked to a final disposition. This is commonly referred to as “charge matching.”

In 2020, SEARCH asked states if they match dispositions based on arrest cycles or individual charges. Twenty-eight states, the District of Columbia, and Guam responded that they use cycle matching when calculating disposition percentages, and 22 states responded that they use charge matching.

¹ Hereafter, the report refers to the Territory of Guam, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands as

Guam, Puerto Rico, and the Virgin Islands.

- In 49 states and the District of Columbia, an average of 69% of all arrests in state databases have final case dispositions reported.
- In 49 states and the District of Columbia, an average of 64% of arrests in state databases within the past 5 years have final case dispositions reported.
- In 46 states, the District of Columbia, and Guam, an average of 72% of felony arrests in state databases have final case dispositions reported.
- Twenty-two states report that 80% or more of all arrests within the criminal history database have final dispositions recorded.
- Thirteen states and the District of Columbia report that 80% or more arrests within the past 5 years in the criminal history database have final dispositions recorded.
- Twenty-three states and Guam report that 80% or more of all felony arrests within the criminal history database have final dispositions recorded.

Overview of state criminal history record system functions, 2020 (table 1a):

- Forty-nine states, the District of Columbia, and Guam processed 20,302,100 fingerprint records in 2020; of these, 7,518,600 were used for criminal justice purposes and 12,783,300 were used and submitted for noncriminal justice licensing, employment, and regulatory purposes (numbers do not sum to total due to rounding).
- In 10 states, the District of Columbia, and Guam, fingerprints processed for *criminal justice purposes* account for more than 50% of the state's total number of fingerprints processed.
- In 39 states, fingerprints processed for *noncriminal justice purposes* account for more than 50% of the state's total number of fingerprints processed.
- Thirty-six states, the District of Columbia, and Guam retain all fingerprints processed for criminal justice purposes.
- Nine states and Guam do not retain any fingerprints processed as part of conducting

noncriminal justice background checks.

Detailed findings

Status of state criminal history files

Number of subjects (individual offenders) in state criminal history file, 2018 and 2020 (table 2):

- Ninety-five percent of the approximately 114.4 million criminal history records maintained by the state criminal history repositories as of December 2020 are automated.
- Eight states (Alabama, Connecticut, Delaware, Massachusetts, Mississippi, New York, Tennessee, Washington) and Guam report an overall decrease in the total number of subjects in manual and automated files between 2018 and 2020.
- Five states (California, Louisiana, New Mexico, South Carolina, and South Dakota) report an overall increase of at least 10% in the total number of subjects in manual and automated files between 2018 and 2020.

- Forty-one states and the District of Columbia report an overall increase in the total number of subjects in manual and automated files between 2018 and 2020.

Criminal history records of Interstate Identification Index (III) participants maintained by state criminal history repositories and the Federal Bureau of Investigation (FBI), 2020 (table 19):

- Nationwide, just over 100 million criminal history records are accessible through the III. The states maintain 73% of all III records and the FBI maintains 27%.

Protection order information

State protection order information, entry of protection orders into FBI-NCIC, and record counts, 2020 (table 3):

- Forty states, the District of Columbia, and Guam maintain a statewide protection order file; collectively, these files contain a total of over 3.8 million records.
- Elapsed time between the issuance of a

protection order and entry of its information into the state protection order file:

- 1 day or less (27 states)
- 2–7 days (10 states, the District of Columbia, and Guam)
- 8–30 days (2 states: Louisiana and Ohio)
- More than 30 days (1 state: Alabama)
- All states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands enter protection order records into NCIC, totaling over 2 million records
- Elapsed time between the issuance of a protection order and entry of its information into the NCIC Protection Order File:
 - 1 day or less (24 states)
 - 2–7 days (17 states, the District of Columbia, and Guam)
 - 8–30 days (2 states: Louisiana and Ohio)
 - More than 30 days (1 state: Alabama)

Warrants and wanted persons

State warrant file information, timeliness of entry, and state severity breakdowns, 2020 (table 4),

State warrants in NCIC and the timeliness of entry into NCIC's Wanted Persons File, 2020 (table 4a):

- Forty states, the District of Columbia, and Guam, maintain warrant files, which total over 6.6 million records. Of these, over 1.4 million represent felony-level warrants and nearly 3.4 million represent misdemeanor-level warrants.
- Elapsed time between the issuance of a warrant and entry of its information into the state file:
 - 1 day or less (14 states)
 - 2–7 days (22 states, the District of Columbia, and Guam)
 - 8–30 days (1 state: Ohio)
 - More than 30 days (1 state: Alabama)
 - Does not maintain a state warrant file (10 states)

- All states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands enter warrant records into NCIC, totaling over 2.8 million records as of December 2020.
- Elapsed time between the issuance of a warrant and entry of its information into NCIC:
 - 1 day or less (12 states)
 - 2–7 days (24 states, the District of Columbia, and Guam)
 - 8–30 days (2 states: Hawaii and Ohio)
 - 30 days or more (3 states: Alabama, Massachusetts, and North Dakota)
 - Not reported (10 states)

Flagging of records

Flagging of records, 2020 (table 5):

- Forty-two states have felony flagging capabilities to quickly determine whether a given subject has a felony conviction.
- Thirty-one states have felony flagging capabilities for all subjects with felony convictions.
- Eleven states have felony flagging capabilities for some subjects with felony convictions.
- Eight states, the District of Columbia, and Guam do not have felony flagging capabilities for criminal history record subjects.
- States employ flagging to indicate:
 - A sex offender registrant (40 states and Guam)
 - A violent offender (12 states and Guam)
 - A misdemeanor crime of domestic violence conviction (18 states and Guam)
 - An active state/NCIC protection order on file (6 states and Guam)
 - An active state/NCIC warrant on file (9 states and Guam)
 - A mental health adjudication (7 states)
 - DNA availability (30 states)
 - A person ineligible for firearms purchases under Federal law (17 states)

- A person ineligible for firearms purchases under state law (11 states)

Accessibility of records and services through state repositories

Access to records, 2020 (table 5a):

- State repositories offer access to:
 - A sex offender registry (45 states, the District of Columbia, and Guam)
 - Orders of protection (36 states, the District of Columbia, and Guam)
 - Wanted persons and warrant information (34 states, the District of Columbia, and Guam)
 - Retained applicant prints (23 states and the District of Columbia)
 - Firearm registration information (7 states and the District of Columbia)
 - Domestic violence incident reports (7 states and the District of Columbia)

Data quality audits and performance monitoring

Repository conducts routine internal and external data quality audits, frequency of audits, 2020 (table 5b):

- Twenty-nine states and the District of Columbia conduct internal data quality audits.
- Frequency in which internal audits are conducted:
 - More than once per year (9 states)
 - Annually (5 states and the District of Columbia)
 - Every 2 years (1 state: Alaska)
 - Every 3 years (3 states: Arizona, Idaho, and Missouri)
 - Other (13 states)
- Twenty-six states, the District of Columbia, and Guam conduct external data quality audits of contributing agencies.
- Frequency in which external audits are conducted:
 - More than once per year (6 states)
 - Annually (3 states: Delaware, Florida,

and Rhode Island, and Guam)

- Every 2 years (4 states: Alaska, Maine, Oklahoma, and Texas)
- Every 3 years (7 states)
- Other (6 states and the District of Columbia)

CCH performance reporting tools to monitor contributor submissions and lights-out processing, 2020 (tables 5c and 5d):

- Thirty states and the District of Columbia report having CCH reporting tools to monitor contributing agency submissions.
- Metrics that these states monitor include:
 - Number of arrests reported by agency (19 states and the District of Columbia)
 - Arrests that are missing dispositions (24 states)
 - Time from arrest to disposition (4 states: Arizona, Indiana, Nebraska, and South Carolina)
 - Number of dispositions reported by law enforcement (6 states)
- Number of dispositions reported by prosecutors (7 states)
- Number of dispositions reported by courts (13 states)
- Dispositions that cannot be linked to a corresponding arrest (17 states)
- Date of disposition to when it is reported to the state repository (8 states)
- Twenty-eight states and the District of Columbia send reports of missing arrests and/or dispositions to contributing agencies.
- Agencies that are sent reports of missing dispositions:
 - Law enforcement agencies (19 states and the District of Columbia)
 - Prosecutors (11 states and the District of Columbia)
 - Courts (16 states and the District of Columbia)
- Sixteen states and the District of Columbia make data quality metrics available to contributing agencies that show missing arrests

- and dispositions, number of records rejected, etc.
- Agencies that are sent these metrics reports:
 - Law enforcement agencies (13 states and the District of Columbia)
 - Prosecutors (5 states: Arizona, Indiana, Texas, Virginia, and Washington, and the District of Columbia)
 - Courts (9 states and the District of Columbia)

Dispositions

Number of final dispositions reported to state criminal history repository, 2018 and 2020 (table 6):

- Fifty states, the District of Columbia, and Guam provided data on the number of final dispositions reported to their criminal history repositories.
- Respondents indicated that nearly 13 million final dispositions were reported in 2020 — a 15% decrease from that reported in 2018.

Disposition totals and disposition reporting to the Federal Bureau of Investigation (FBI), 2018 (table 6a):

- In accordance with acceptable National Fingerprint File (NFF) practices, 16 of the 23 NFF-participating states have elected not to send disposition information to the FBI on second and subsequent arrests.
- Thirty-one states, the District of Columbia, and Guam sent over 5.8 million final case dispositions to the FBI.
- Four states (Alaska, North Dakota, Pennsylvania, and Vermont) sent 95% or more final case dispositions to the FBI via machine-readable data (MRD).
- Two states (Virginia and West Virginia) sent 100% of their final case dispositions to the FBI via hard copy or paper.
- Eighteen states and the District of Columbia sent 100% of their final case dispositions to the FBI via III message key.
- Eight states and Guam forwarded 95% or more of their dispositions to

the FBI via a secure web portal that was first made available to states in 2016.

Interim disposition reporting and posting of indictment information, 2020 (table 6b):

- Thirty states collect charge-tracking information (interim dispositions) to show case status through the criminal justice process.
- Sixteen states and Guam post indictment information to the criminal history record.

Disposition reporting by local prosecutors, 2020 (table 6c):

- Thirty-five states receive final court dispositions from local prosecutors.
- Eleven states receive dispositions from local prosecutors via automated means through a centralized (statewide) prosecutors' case management system (CMS).
- Three states (Kansas, Michigan, and Oklahoma) receive dispositions from local prosecutors via a local prosecutors' CMS.

- Fifteen states receive dispositions from local prosecutors in paper form.
 - Fourteen states receive dispositions from local prosecutors via a mix of automated and paper-based processes.
 - Repositories in 15 states, the District of Columbia, and Guam do not receive dispositions from local prosecutors.
- Matching of dispositions between prosecutors and the repository, 2020 (table 6d):*
- Twenty-three states match dispositions received from prosecutors through a Process Control Number (PCN) or a Transaction Control Number (TCN) that was assigned when fingerprints were taken at the time of arrest/booking.
 - Five states (Arizona, Idaho, Michigan, Oregon, and Utah) match dispositions received from prosecutors through a PCN or a TCN that was assigned subsequent to arrest/booking.
 - Sixteen states match dispositions received from prosecutors
- through a comparison of the State Identification Number (SID) and 13 states match dispositions by the Arrest Number.
- Twenty-four states match dispositions received from prosecutors by the subject's name and date of birth, and 18 states match dispositions by charge.
- Receipt of court disposition information by automated means and record matching, 2020 (table 7):*
- Forty state repositories and the District of Columbia receive court disposition data by automated means.
 - Repositories in 10 states and Guam do not receive automated dispositions from the courts.
 - Twenty-two states and the District of Columbia report that 90% or more of all court dispositions are reported to repositories by automated means.
 - Twenty-six states match dispositions received from courts through the assignment of a PCN or a TCN that was assigned when fingerprints were taken at the time of arrest/booking.
 - Seven states match dispositions received from courts through the assignment of a PCN or a TCN that was assigned subsequent to arrest/booking.
 - Twenty-five states and Guam match dispositions received from courts through a SID, and 21 states and the District of Columbia match dispositions received from a court with an Arrest Number.
 - Thirty-six states and Guam match dispositions received from courts by the subject's name, while 34 states and Guam use date of birth, and 20 states match dispositions by including charge information.
- Matching of dispositions received to specific arrest events, 2020 (table 7a):*
- Ten states report that 25% or more of all dispositions received could not be linked to a specific repository arrest record.
 - Some states have dispositions that cannot be matched to a specific

- arrest; when this occurs, 27 states place the dispositions into a suspense file for further investigation, and 8 states place the dispositions into a suspense file with no further action.
- Repository staff in 36 states conduct follow-up actions when dispositions cannot be matched to a specific arrest. In 28 states, repository staff follows-up and contacts the court to obtain additional information.
 - Five states report that when a disposition cannot be matched to an arrest, the court-provided charges from the disposition are posted to the beginning/end of the subject's criminal history record.
 - Twenty states and the District of Columbia reject dispositions that cannot be matched to an arrest and 11 states and the District of Columbia report having other additional means and methods to match dispositions to arrests.
- Timeliness of receipt and entry of final felony court case disposition information, 2020 (table 7b):*
- Elapsed time between the occurrence of a final felony court disposition and its receipt by the repository:
 - 1 day or less (14 states and Guam)
 - 2–7 days (5 states: Colorado, Kentucky, New Hampshire, New Jersey, and Rhode Island, and the District of Columbia)
 - 8–30 days (14 states)
 - 31–90 days (10 states)
 - 91–180 days (North Dakota)
 - 181–365 days (Kansas)
 - More than 1 year (Indiana)
 - Elapsed time between the receipt of a final court case disposition and its entry into the state's criminal history record database:
 - 1 day or less (22 states and the District of Columbia)
 - 2–7 days (9 states and Guam)
 - 8–30 days (8 states)
- 31–90 days (5 states: Arkansas, California, Louisiana, Nevada, and Wyoming)
 - 91–180 days (New Mexico)
 - 181–365 days (Arizona)
 - More than 1 year (Kansas)
- State criminal history repository practices**
- Arrest fingerprint cards processed, 2016, 2018, and 2020 (table 8):*
- During 2020, over 7.5 million arrest fingerprint cards were submitted to state criminal history repositories, a 28% decrease from that which was reported in 2018.
 - One state (Mississippi) and Guam reported an overall increase in the total number of arrest fingerprint cards submitted to the state repository.
- Arrest/fingerprint reporting, 2020 (table 8a):*
- Forty-seven states, the District of Columbia, and Guam report having a total of 14,503 law enforcement agencies that submit arrest prints via livescan.

- Thirty-six states and the District of Columbia report that 90% or more of all arrest prints are submitted to the repository via livescan.
 - Cardscan technology is used by 292 law enforcement agencies to submit arrest fingerprint images to state repositories.
 - Nearly 5,300 law enforcement agencies submit hard copy arrest fingerprint cards to state repositories.
- Citation file record counts; cite and release practices, 2020 (table 9):*
- Five states (Alabama, Kansas, Minnesota, New Hampshire, and Utah) maintain statewide citation files containing over 1 million citation records; 22,708 new citations were added to these files in 2020.
 - Do statewide law enforcement agencies routinely cite and release individuals without fingerprinting:
 - No (3 states: Illinois, South Dakota, and Texas, and the District of Columbia and Guam)
 - Yes, only for violations (6 states: Michigan, Mississippi, New Jersey, New York, Rhode Island, and Wyoming)
 - Yes, for both violations and misdemeanors (22 states)
 - Yes, for all criminal offenses, including felonies (18 states)
- Fingerprinting of individuals who have been issued citations in lieu of arrest, 2020 (table 9a):*
- A total of 30 states report having a law or administrative rule in place that requires courts to order persons who have not been fingerprinted to do so prior to or after an initial court hearing. Of these, 26 states have a law and 4 states (Georgia, Hawaii, Maine, and North Dakota) have an administrative rule.
 - For both violations and misdemeanors (4 states: Georgia, Kansas, Montana, and Virginia)
 - For all criminal offenses, including felonies (22 states)
 - Removal of records upon death and purging of records when a subject reaches a certain age, 2020 (table 9b):
 - Ten states and the District of Columbia report that upon receiving a death notice from an authorized source, the decedent's criminal history record is removed from state criminal history files.
 - Twelve states and the District of Columbia require that fingerprints of the decedent be submitted before a record can be removed; 2,013 such decedent records were removed from criminal history record files in 2020.
 - Fifteen states and the District of Columbia purge a subject's record from criminal history files when the subject of the record reaches a certain age; 2,323 such records were purged in 2020.
 - Thirteen of the reporting states purge records from criminal history files when the subject of the record reaches 99 to 120 years old. Three of these states (Michigan, Ohio, and Oregon) and the District of Columbia review the subject's

record to determine if (a) new information has been posted and (b) the record should remain active.

Electronic fingerprint capture devices and the submission and rejection of arrest fingerprints, 2020 (table 10):

- Forty-nine states, the District of Columbia, and Guam report receiving over 6.7 million arrest fingerprint records by livescan.
- Over 35,000 fingerprint records were scanned and submitted to repositories using cardscan, and nearly 255,000 hard copy arrest fingerprint cards were submitted and received from law enforcement.
- Twenty-five states and the District of Columbia report rejecting 1% to 19% of arrest fingerprint records received for poor quality.
- Twenty-two states and Guam report they did not reject any fingerprint records for poor quality.

Arrest fingerprint card backlog, 2020 (table 10a):

- Ten states report having a backlog of arrest fingerprint cards. Five of these states (Alaska, Hawaii, Nebraska, Tennessee, and Wisconsin) indicate there are over 6,600 records in the backlog. This represents a 99% reduction of backlogged fingerprint cards from 2018.
- Age of backlogged arrest fingerprint card information:
 - 1 month or less (6 states)
 - 2–6 months (3 states: Maine, New Hampshire, and Tennessee)
 - 7–12 months (Wisconsin)
 - More than 1 year (Alabama and Hawaii)

Electronic fingerprint capture devices and the submission of fingerprints for noncriminal justice purposes, 2020 (table 10b):

- Forty-eight states, the District of Columbia, and Guam report submitting over 11 million noncriminal justice fingerprints to state repositories by

livescan, while 36 states and the District of Columbia submitted nearly 893,000 cardscan fingerprints to state repositories in 2020.

- Thirty-one states, the District of Columbia, and Guam report sending 90% or more of their noncriminal justice fingerprints to their state repository via livescan, while 7 states utilize cardscan for sending 60% or more of their noncriminal justice fingerprints to their state repository.

Mobile technology for capturing and transmitting fingerprints, 2020 (table 10c):

- Thirty-two states and the District of Columbia use mobile technology to transmit fingerprints for identification purposes.
- Two states (Arizona and Rhode Island) use mobile technology to transmit fingerprints for booking purposes.
- Eight states and Guam plan to implement mobile technology to capture non-fingerprint biometric information.
- Thirty-one states, the District of Columbia, and Guam employ Rapid

- ID and have conducted nearly 1.2 million searches that produced over 708,000 “hits” or positive responses.

Privatization of noncriminal justice fingerprint capture services, 2020 (table 11):

- Thirty-five states have privatized the capture of noncriminal justice fingerprints. In 21 of these states, a single vendor provides this service and in 14 instances, additional vendor services are provided (such as billing and collection services, verification of identification documents, and photo capture).
- In 33 states the vendor assesses a fee above what the state charges for the background check. These fees range from \$6.50–\$30.

Livescan devices in courtrooms and disposition backlogs, 2020 (table 12):

- Seventeen states and Guam use livescan devices in courtrooms to link positive identifications with dispositions. In those states, 220 livescan devices are in use within courtrooms.

- Twenty-five states and the District of Columbia report having a backlog of over 7 million court dispositions that need to be processed and entered into state criminal history databases.

- Twelve states and the District of Columbia performed over 541,000 additional name-based noncriminal justice background checks that were received via other means, such as modem or public walk-in access.

Noncriminal justice background checks

Noncriminal justice name-based background checks, 2020 (table 13):

- Forty-two states, the District of Columbia, and Guam performed over 14.6 million name-based noncriminal justice background check inquiries.
- Twenty-eight states and Guam performed nearly 13.3 million name-based noncriminal justice background checks that were received via the internet.
- Thirty-two states and the District of Columbia performed over 362,000 name-based noncriminal justice background checks that were received via mail.
- Two states (Nevada and Oregon) received over 192,000 name-based noncriminal justice background checks via telephone.

Noncriminal justice fingerprint-based background checks, 2020 (table 14):

- Information contained in the results of a fingerprint-based noncriminal justice background check:
 - Full record (43 states, the District of Columbia, and Guam)
 - Convictions only (17 states)
 - Juvenile records (11 states)
 - Arrests without dispositions—over 1 year old (22 states)
 - Other (7 states)
- Thirty-five states and the District of Columbia report that 10% or more fingerprint-based noncriminal justice transactions are identified against arrest fingerprints.

Noncriminal justice background checks performed against national and state databases, 2020 (table 15):

- Thirty-six states and Guam conduct national checks for daycare providers; 12 states and Guam conduct both national and state checks, while the District of Columbia and Mississippi conduct state-only checks for these providers.
- Thirty-one states and Guam conduct national checks for caregivers at residential facilities; 12 states and the District of Columbia conduct national and state checks, while 6 states conduct state-only checks for these caregivers.
- Thirty-eight states conduct national checks for schoolteachers, while 12 states and the District of Columbia conduct both national and state checks for teachers.
- Thirty states conduct national checks for non-teaching school personnel; 16 states conduct both national and state checks, while 3 states (Mississippi, North Carolina, and
- West Virginia) and the District of Columbia conduct state-only checks for these personnel.
- Thirty-one states and Guam conduct national checks for volunteers who work with children; 14 states conduct both national and state checks, while 4 states (Mississippi, New York, North Carolina, and Washington) and the District of Columbia conduct state-only checks for these volunteers.
- Thirty-six states and Guam conduct national checks for prospective foster care parents; 11 states and the District of Columbia conduct both national and state checks, while 3 states (Mississippi, New York, and South Dakota) conduct state-only checks for these individuals.
- Thirty-three states and Guam conduct national checks for prospective adoptive parents; 13 states and the District of Columbia conduct both national and state checks, while 3 states (Mississippi, New York, and South Dakota) conduct state-only

checks for these individuals.

- Thirty states conduct national checks for caregivers of relatives; 11 states and the District of Columbia conduct both national and state checks, while 5 states (Kentucky, Louisiana, Mississippi, South Dakota, and Virginia) conduct state-only checks for these caregivers.
- Thirty-two states conduct national checks for nurses and elder caregivers; 12 states and the District of Columbia conduct both national and state checks, while 5 states (Alabama, Iowa, New York, Virginia, and Wyoming) conduct state-only checks for nurses and elder caregivers.
- Twenty-three states conduct national checks for legal guardians; 7 states and the District of Columbia conduct both national and state checks, while 5 states (California, Colorado, Maine, Maryland, and Nebraska) conduct state-only checks for legal guardians.

- Seventeen states conduct national checks for hazardous materials licensees; 6 states conduct both national and state checks, while New York and Rhode Island conduct state-only checks for hazardous materials licensees.
- Twenty-five states conduct national checks for medical marijuana dispensers and caregivers; 8 states conduct both national and state checks, while 3 states — Connecticut, New Mexico, and Oklahoma — conduct state-only checks for medical marijuana dispensers and caregivers.

Bulk sale of criminal history record data to private background check companies, 2020 (tables 16 and 16a):

- Repositories in 5 states (Connecticut, Maine, Minnesota, Nebraska, and Texas) provide bulk copies of criminal history records to private background check companies. Data is generally provided back to the requestor in accordance with subscription service terms or through weekly, biweekly, or monthly

data extractions in 4 states (Maine, Minnesota, Nebraska, and Texas).

Noncriminal justice background check fees and fee allocation, 2020 (table 17):

- All states, the District of Columbia, and Guam report charging a fee to conduct a search of the state's criminal history database for noncriminal justice purposes.
- Twelve states, the District of Columbia, and Guam allocate all fees collected for such purposes to their state general fund, with repositories funded by general fund allotments.
- Twenty-seven states allocate all fees collected for noncriminal justice background checks to fund their state repository.
- Three states (Georgia, New York, and Wisconsin) allocate a portion of fees collected to support repository operations.

Web-based services for noncriminal justice purposes, 2020 (table 18):

- Twenty-four states provide web-based noncriminal justice background checks to the public.
- Twenty states collect a public access fee to conduct a background check of internet requests. Fees charged per inquiry range from \$2.25 in Texas to \$30 in Vermont.

Record sealing and expungements

Record sealing and expungements, 2020 (tables 20 and 20a):

- Forty-six states, the District of Columbia, and Guam have statutes and/or policies that define criminal history record sealing and expungement procedures.
- Twenty-one states report making sealed records accessible for research purposes.
- How requests to seal/expunge records are received by repositories:
 - In-person (22 states and the District of Columbia)

- Mail (35 states and the District of Columbia)
 - Fax (19 states and the District of Columbia)
 - Online portal/website (7 states)
 - System-to-system (11 states)
 - Email (9 states and the District of Columbia)
- Thirty-three states, the District of Columbia, and Guam track the number of sealing and expungement requests they receive. In 2020, repositories received over 2.8 million sealing requests and over 298,000 expungement requests.

Some states have adopted laws and/or policies to seal/expunge records without the need to file a petition with the courts. In 2020, repository systems sealed over 1.5 million records and nearly 504,000 records were expunged through a state-initiated records clearance process.

Table 1. Overview of state criminal history record systems, December 31, 2020

State	Number of subjects (individual offenders) in state criminal history file			Percent of arrests in database that have final case dispositions recorded			Cycle or Charge Matching
	Total	Automated	Manual	Arrests in the entire database with final dispositions	Arrests entered within past 5 years	Felony charges with final dispositions	
Total	114,376,500	109,149,100	5,227,400	69	64	72	
Alabama	1,878,300	1,675,100	203,200	37	20	45	Cycle matching
Alaska	281,400	271,300	10,100	90	92	90	Charge matching
American Samoa	nr						
Arizona	2,063,400	1,924,500	138,900	52	a	65	Charge matching
Arkansas	843,500	843,500	0	56	40	39	Cycle matching
California	11,905,200	10,933,900	971,300	42	b	55	Cycle matching
Colorado	1,907,600	1,907,600	0	26	49	46	Cycle matching
Connecticut	633,500	439,700	193,800	na	c	na	Charge matching
Delaware	339,500	339,500	0	93		91	Cycle matching
District of Columbia	698,800	698,800	0	60	88	71	d
Florida	7,267,100	7,267,100	0	56		56	Charge matching
Georgia	4,516,000	4,516,000	0	84	f	62	76
Guam	1,200	1,200	0	na		na	Cycle matching
Hawaii	620,400	620,400	0	96		86	Charge matching
Idaho	456,400	456,400	0	52		19	42
Illinois	7,814,200	7,251,800	562,400	72		52	Cycle matching
Indiana	1,946,200	1,946,200	0	57		59	Cycle matching
Iowa	817,700	812,700	5,000	98		84	Cycle matching
Kansas	1,681,500	1,266,800	414,700	55		38	Cycle matching
Kentucky	1,626,000	1,626,000	0	43		16	Cycle matching
Louisiana	2,545,400	1,936,700	608,700	27		23	Charge matching
Maine	628,300	603,300	25,000	84		71	Charge matching
Maryland	1,683,000	1,683,000	0	95		94	Cycle matching
Massachusetts	1,449,200	1,379,200	70,000	22		22	na
Michigan	2,751,100	2,751,100	0	81		79	86
Minnesota	1,118,100	1,118,100	0	81		76	Cycle matching
Mississippi	736,000	736,000	0	16		6	i
Missouri	1,712,000	1,573,900	138,200	78		67	82
Montana	278,700	278,700	0	60		49	Charge matching
Nebraska	478,000	478,000	0	82		73	Cycle matching
Nevada	984,500	984,500	0	61		63	Cycle matching
New Hampshire	566,400	566,400	0	89		87	Cycle matching
New Jersey	2,621,000	2,473,200	147,800	94		96	Cycle matching
New Mexico	1,332,300	634,100	698,300	58	j	21	72
New York	7,768,000	7,768,000	b	0		94	87
North Carolina	1,936,100	1,936,100	0	82		67	88
North Dakota	220,600	210,600	10,000	91		91	Charge matching
No. Mariana Islands	nr						
Ohio	2,770,900	2,431,400	339,500	61		65	55
Oklahoma	1,135,200	1,066,400	68,800	72		67	77
Oregon	1,345,900	1,345,900	0	59		40	84
Pennsylvania	3,497,500	3,260,600	236,800	77		69	93
Puerto Rico	nr						
Rhode Island	308,000	308,000	0	87		85	83
South Carolina	2,126,600	2,088,500	38,000	71		na	13
South Dakota	307,900	307,900	0	67		72	nr
Tennessee	2,184,100	2,184,100	0	50		75	nr
Texas	16,607,300	16,607,300	0	82		95	84
Utah	855,300	855,300	0	79		72	82
Vermont	259,900	259,900	0	93		81	90
Virgin Islands	nr						
Virginia	2,467,200	2,332,300	134,900	89		84	90
Washington	1,782,800	1,782,800	0	88		69	86
West Virginia	726,900	514,900	212,000	64		70	53
Wisconsin	1,664,800	1,664,800	0	82		77	98
Wyoming	229,600	229,600	0	87		75	87

State performs either cycle matching or charge matching to calculate the percentage of arrests in database that have final case dispositions recorded

Table 1 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).
- unk (unknown).
- The "number of subjects (individual offenders)" in the state criminal history file for each year applies only to the criminal history file, including partially automated files, and does *not* include release by police without charging, declinations to proceed by prosecutor, or final trial court dispositions.
- The "number of subjects (individual offenders)" in the state criminal history file for each year includes persons with records in multiple states and may contain records of persons now deceased.
- The total number of subjects (individual offenders) in state criminal history files does not include American Samoa, the Northern Mariana Islands, Puerto Rico and the Virgin Islands.

Data footnotes:

- a. Arizona reports a 21% increase in dispositions in their CCH database over 2018 due to a backlog reduction effort.
- b. California reports a decrease from 2018 in the percentage of arrests in its CCH database that have final case dispositions. This decrease from 63% to 42% is attributable to a number of factors, but foremost are new counting methodologies associated with updated/revised court reporting protocols following migration to a new court case management system.
- c. Percentage of 2020 arrests that have final case dispositions recorded in this cycle are not available due to changes in the system used to capture this data, as reporting mechanisms were not built into the new system to arrive at these numbers.
- d. Percentage of 2020 arrests that have final case dispositions recorded is not available; therefore, arrest percentages from 2018 are used.
- e. Overall note regarding disposition rates in Florida: There are arrest records maintained within the repository for which the state reports it will never receive corresponding dispositions due to the age of the records in question, loss of hard copy data due to natural disaster prior to electronic reporting, or the fact that they are criminal traffic offenses, which are not included in the transmission of data from the Clerks of Court consistently in all counties.
- f. Percentages reported in 2018 for arrests entered within the past 5 years (85%) and arrests in the entire database (72%) were reported in error. These were corrected by reversing them to 72% for records entered within the past 5 years and 85% for arrests in the entire database.
- g. Maine utilizes an Arrest Tracking Number (ATN) that follows the individual through the criminal justice process. "Charge Matching" was selected, as the state matches ATN to ATN for each agency that submits information.
- h. Based on current system limitations, the state is unable to provide a response.
- i. Low percentages are due to a number of factors: Lack of training of court clerks, turnover, illegible handwriting on manual documents, court information system not linked to criminal history repository system, and updated records at local level that are not being forwarded to repository systems, etc.
- j. Percentage increases in 2020 over 2018 are a result of including dispositions on a storage disk that were not counted in prior years.

Table 1a. Overview of state criminal history record system functions, 2020 (continued)

State	Fingerprints processed for criminal justice purposes					Fingerprints processed for noncriminal justice purposes					
	Total number of fingerprints processed	Total criminal justice purposes	Retained	Percent of 2020 volume	Not retained	Percent of 2020 volume	Total noncriminal justice purposes	Retained	Percent of 2020 volume	Not retained	Percent of 2020 volume

Table 1a explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).
- The total number of fingerprint-based background checks in state criminal history files does not include Alabama, American Samoa, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands.

Data footnotes:

- a. The total number of fingerprints processed does not equal the sum of fingerprints processed for criminal and noncriminal justice purposes due to rounding.
- b. Alabama is in the process of upgrading its legacy Automated Fingerprint Identification System (AFIS) to a new Automated Biometric Identification System (ABIS). Record counts are not available until the new system is operational.
- c. These fingerprints are submitted for inquiry purposes only. They generally are received from probation and parole and/or corrections as part of a presentencing investigation or an inmate classification process to receive a copy of a record matching a subject's fingerprints.

Table 2. Number of subjects (individual offenders) in state criminal history file, 2018 and 2020

State	Number of subjects in manual and automated files, 2018, and 2020				Percent of automated files		Percent change in total file	
	2018 total	2020 total	Manual file	Automated file	2018	2020	2018–2020

Table 2 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- nr (not reported).
- The totals for the percent of automated files and the percent change in total files represent percentages of column totals, not averages.
- The total number of subjects in manual and automated state criminal history files for 2020 does not include American Samoa, the Northern Mariana Islands, Puerto Rico, and the Virgin Islands.
- The "number of subjects (individual offenders)" in the state criminal history file for each year applies only to the criminal history file, including partially automated files, and does not include the master name index.

Data footnotes:

- a. Resources necessary to gather statistics for 2018 were unavailable. SEARCH estimated the number of subjects in Alabama's criminal history repository based on responses provided in the three prior survey cycles. Alabama reports that the 2020 decrease of 23% in the number of subjects in the state's criminal history file is the result of including civil applicant records in prior year totals. The total for 2020 excludes applicant records.
- b. In 2018 and in prior cycles of this report, Delaware included temporary records and civil citations that are not supported by a full set of fingerprints and are not a true representation of the state's criminal history records database. Consequently, the number of subjects (individual offenders) in Delaware's criminal history file is significantly less in 2020 than what was reported in 2018 and in previous cycles, as temporary records and civil citations are now excluded.
- c. Rather than tracking the number of subjects in the criminal history repository, Guam tracks the number of criminal cases filed each year. The count that appears in the table refers to the number of criminal cases filed during 2020.
- d. The number of manual records reported in 2018 (142,986) was reported in error and was significantly understated, causing the percentage change increase between 2018 and 2020. Corrected numbers for 2018 are not available.
- e. Michigan initiated an open case clean-up, as well as conducting more thorough training to law enforcement and prosecutors on the proper reporting of unauthorized charges. This has resulted in the deletion/expungement of numerous criminal SIDs/subject records that are in the state's database.
- f. The 2020 decrease resulted from scheduled file maintenance and purging of records that met established purge criteria.
- g. The 2020 increase over 2018 is a result of including dispositions located on a storage disk that were not counted in prior years.
- h. The 2020 reporting reflects a decrease from 2018 totals. This decrease is a result of 2019 state-enacted legislation that required the expungement of fingerprints associated with certain conviction outcomes. This resulted in a net reduction in the number of identifiable subjects in the state's repository.
- i. North Carolina was testing and implementing a new AFIS. Resources necessary to gather statistics for 2018 were not available to respond. Since numbers have not significantly changed from what was provided in previous cycles, the state provided estimates where it was reasonable to do so.
- j. The reason for the decrease in 2020 from 2018 is not known.

Table 3. State protection order information, entry of protection orders into FBI-NCIC, and record counts, 2020

State	State maintains a protection order (PO) file	Elapsed time between issuance of a PO and entry of its information into the state PO file	Number of active records in the state PO database as of 12/31/2020	Are PO's entered into NCIC?	Elapsed time between issuance of a PO and entry of its information into the NCIC PO file	Number of active records in NCIC's PO file as of 12/31/2020

Table 4 explanatory notes:

- na (not available).
- nr (not reported).

Data footnotes:

- Felony, misdemeanor, and other warrant breakdowns do not match the total number of active warrants in state databases due to individual counts not being available (na) in Maine, Montana, Nebraska, Nevada, New Hampshire, North Dakota, and Vermont.
- State does not maintain a warrant file.
- States reporting "Other" indicate that warrants in this category are not categorized, pertain to attempt to locate, civil, child support, juvenile, ordinance infractions, small claims, traffic-related, and/or matters that are not eligible for entry.

Table 6 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).
- **Final Case Disposition:** Defined as the formal or informal conclusion of an arrest charge at whatever stage of an arrest charge at whatever stage it occurs in the criminal justice process (e.g., release by police after arrest without charging; decline to process (e.g., release by police after arrest without charging; decline to proceed by prosecutor; or final trial court disposition).

Data footnotes:

- a. Due to COVID-19 impacts causing court closures, increased use of non-fingerprint-supported citations by law enforcement, employees working from home, etc., disposition receipts in 2020 decreased by 15% from 2018.
- b. The 2020 increase is attributable to a disposition reporting project between the state's repository and Arizona courts.
- c. Counting of dispositions for 2020 is understated, as only temporary and suspense records were counted from 1/1/2020–12/31/2020. The remaining records are not available at this time.
- d. During 2020, Florida counties submitted large batches of disposition data. This accounts for the increase in dispositions over 2018.
- e. Increases in 2016 and 2018 disposition receipts are due to efforts to capture missing dispositions on previously submitted arrests that are without dispositions. Working with vendors and statewide courts, an online disposition reporting portal has been developed to improve disposition reporting going forward.
- f. Increases in reported dispositions is a result of efforts made to receive electronic dispositions from the state supreme court.
- g. A project is underway to link court disposition data to the repository, where increases in disposition reporting totals have been realized and are anticipated in the future.
- h. The 2018 increase is attributable to implementing a new CCH system and counting court cases instead of cycles.
- i. In addition to COVID-19 impacts, the 2020 decrease reflects the number of dispositions that were processed in 2020 but not received. Counts of dispositions received are not available because of manual processes. The decrease from 2018 is a direct result of entering fewer dispositions into the state's CHR database because of staff reductions. Management is working to shift disposition processing duties to other program staff until staffing levels can be restored.
- j. The 2020 increase over previous cycles is a result of including dispositions on a storage disk that were not counted in prior years.
- k. In addition to COVID-19 impacts, a reporting discrepancy is suspected from 2018 tables to that which is reported for 2020. 2018 totals are believed to be overstated, but reporting entities are no longer available to consult.
- l. Using a different counting methodology from that used by the criminal history records repository in previous cycles, the number of final case dispositions were reported by the state's Judiciary.
- m. The 2020 total is based on estimates from the state's court case management system.

Table 6a. Disposition totals and disposition reporting to the Federal Bureau of Investigation (FBI), 2020

Of dispositions sent to the FBI, percent sent by:

- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).

NOTE: National Fingerprint File (NFF) states are signatories to the National Crime Prevention and Privacy Compact, under which these states have agreed to provide all criminal history information when responding to requests received from the FBI in connection with national civil purpose background checks. Consequently, disposition information is made available for all inquiries received from the FBI for arrests that occurred subsequent to the state becoming an NFF participant. In some instances, an NFF state may provide information that predates NFF participation. States that do not participate in the NFF program continue to voluntarily forward disposition information to the FBI.

Data footnotes:

- a. Dispositions sent to the FBI are not tracked.
- b. NFF-participating state.

Table 7a explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- nr (not reported).

Data footnotes:

- a. When possible, data is corrected.
- b. Estimated.
- c. Added to repository as an "orphan disposition."
- d. During the matching process, all erroneous information is corrected when it is discovered.
- e. Added to error resolution table.
- f. Due to 2018 efforts to solicit historical disposition data from the Clerks of Court, several batch submissions of disposition data occurred beyond normal volume processing. The repository was able to add many previously missing dispositions and updated numerous existing dispositions. However, many of these records also were not able to be linked to arrests within the repository because they appeared to be duplicates, etc., thus increasing the state's overall "unmatched" disposition rate compared to other survey cycles.
- g. Arresting agency is notified for follow-up action.
- h. Missing arrest letter system generated.
- i. Only non-targeted misdemeanors or lesser offenses are rejected if the disposition cannot be matched to an arrest.
- j. Exception reports are generated and sent to applicable court for review and resubmission.
- k. Held in a holding file until the arrest is received, then it is automatically posted.
- l. Placed in a suspense file and checked daily for arrest information.

Table 7b. Timeliness of receipt and entry of final felony court case disposition information, 2020

Table 8 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- Numbers have been rounded to the nearest 100.
- na (not available).
- nr (not reported).

Data footnotes:

- a. Due to COVID-19 impacts causing fewer in-custody arrests, bookings at local and county jails, increased use of non-fingerprint-supported citations by law enforcement, employees working from home, etc., fingerprint receipts for arrests and other criminal justice purposes in 2020 decreased by 28% from 2018.
- b. Alabama is in the process of upgrading its legacy Automated Fingerprint Identification System (AFIS) to a new Automated Biometric Identification System (ABIS). Record counts are not available for this reporting cycle.
- c. The 2016 and 2018 decreases in the number of fingerprints processed for criminal justice purposes are attributable to Maryland's diversion approach for advancing criminal justice reform. Maryland's governor signed into law the Justice Reinvestment Act with the goal to reduce prison populations. This caused many police agencies to broaden cite and release policies where arrest fingerprints are not recorded when a subject is arrested.
- d. Montana reports that 2018 numbers of fingerprints processed for criminal justice purposes increased because of efforts made to capture the fingerprints of older arrest and disposition transactions, increased use of livescan, and more effective statewide training.

Table 8a. Arrest/fingerprint reporting, 2020

State	Number of law enforcement agencies that submit arrest prints via livescan	Percent of arrest prints submitted via livescan	Number of agencies that submit arrest fingerprints via cardscan	Number of agencies that submit hard copy arrest fingerprint cards

Table 8a explanatory notes:

- na (not available).
- nr (not reported).

Data footnotes:

- a. All Florida Sheriff's Offices submit arrests electronically; hard copy fingerprint cards are mailed to FDLE for processing as exceptions.
- b. Estimated.
- c. There are 303 livescans in Pennsylvania. The PA State Police does not have records on how many agencies actually use them, as there are many shared sites. Hard copy cards are accepted from all law enforcement agencies and the number provided is just an estimate.
- d. Some agencies submit hard copy for book and release. No records are kept on the number of agencies that submit hard copies.

Table 9. Citation file record counts; cite and release practices, 2020

Do local law enforcement agencies routinely
cite and release individuals without fingerprinting?

State	State maintains a statewide criminal citation file	Number of criminal citations on file	Number of criminal citations added to file in 2020	Do local law enforcement agencies routinely cite and release individuals without fingerprinting?

Table 9 explanatory notes:

- Percentages and numbers reported are estimates.
- Percentages have been rounded to the nearest whole percent.
- na (not available).
- nr (not reported).

Data footnotes:

- a. All criminal citations (misdemeanor/felony) are maintained in the repository.
- b. One or two counties use cite and release for non-violent felony arrests when the jail is full.
- c. There is no law or policy that requires the courts to order fingerprints of subjects. However, state law does require "If the person is convicted of any violation, the law enforcement agency shall collect the person's biometric data before sentencing if it was not previously collected."
- d. The state's criminal citation file is administered by the State Court Administrator's Office.

Table 9a. Fingerprinting of individuals who have been issued citations in lieu of arrest, 2020

State	Is there a state law or administrative rule in place requiring courts to order persons who have not been fingerprinted to do so prior to or after an initial court hearing?	For violations only	For both violations and misdemeanors	For all criminal offenses, including felonies

Table 10c explanatory notes:

- na (not available).
- nr (not reported).

† Nonfingerprint biometric information: Includes the capture of scars, marks and tattoo images, facial recognition, and iris data.

† Rapid ID technology: Enables authorized users to instantly search local, state, and federal databases to confirm the identity of a person via fingerprints captured using mobile or tethered fingerprint devices, and to query various criminal justice databases for additional information about the individual. Searches can include criminal history record information, outstanding warrants, sex offender status, probation and parole supervision status, caution indicators, and mugshots.

Table 11. Privatization of noncriminal justice fingerprint capture services, 2020

State	Has the state privatized the taking of noncriminal justice fingerprints?	Fingerprinting service provided by single vendor or multiple vendors	Does the vendor assess a fee above what the state charges for the background check?	Fee	Additional vendor-provided services

Table 11 explanatory notes:

- na (not available).
- nr (not reported).
- Fees charged have been rounded to the nearest dollar.

Additional vendor-provided services:

- a. In some instances, the vendor delivers the fingerprint cards to the repository for processing.
- b. Electronic application, fee collection, and photo capture for security guard licenses.
- c. Vendors collect and remit license/certification/permit fees.
- d. Vendor provides customized website registration, electronically captures and submits applicant fingerprints to the repository, and routes criminal history responses to the program's secure web server for retrieval by the authorized requester. Agencies log into the secure website to access search results.
- e. Some vendors do fingerprint capture only. Others transmit prints electronically to the repository on behalf of the authorized agency.
- f. The vendor sends responses to the requestor.
- g. Louisiana has begun implementation of a civil applicant processing solution that is currently being built.
- h. The vendor maintains the registration website and results portal for staff and applicant entities to view and print results.
- i. The vendor manages the results portal.
- j. Fee collection.
- k. Verification of ID documents, photo capture and transmission.
- l. The vendor provides fingerprint enrollment and billing services.
- m. Fee collection and tracking; provides reports for state agencies using their services.
- n. Sends response back to the requestor.

Wyoming	Yes	All fees go to the state general fund, with repository funded by general fund allotment	

Table 17 explanatory notes:

- na (not available).
- nr (not reported).

Data Footnotes:

- a. Allocated to applicant business unit fund.
- b. 50% allocated to AR Crime Information Center to maintain repository; 50% to the AR State Police to maintain AFIS.
- c. Fees go into a trust fund; the legislature allocates the trust fund to fund criminal justice information systems.
- d. Statutorily dedicated to the State Treasurer's Criminal ID Fund Account for most repository operations, but used elsewhere when authorized.
- e. \$1 of each fee collected goes to an SBI tech fund, with the remaining balance to the general fund.
- f. All fees support the repository and AFIS.
- g. 25% of each fee collected supports improvements to the repository, but does not support operating costs.
- h. Pennsylvania State Police.
- i. State general fund and SLED operations.

Table 18. Web-based services for noncriminal justice purposes, 2020

Table 19 explanatory notes:

* As of September 2021, state is a participant in the National Fingerprint File (NFF).

† As of July 2019, state is a signatory of the National Crime Prevention and Privacy Compact.

As of July 2019, state has entered into a Memorandum of Understanding with the Compact Council, indicating the state's support of the Compact and Compact Council.

FBI-supported: The FBI provides the criminal history records for persons arrested by a Federal agency and arrest data that III-participating states are unable to provide.

State-supported: A designated agency within a state referred to as a "III participant" provides records from its file upon receipt of an electronic notification from III.

(Source: FBI/CJIS, Interstate Identification Index/National Fingerprint File Operations and Technical Manual, December 2005)

Tennessee	Yes	Yes, expungement only	Yes	X	X	X	X			X
Texas	Yes	Yes, both sealing and expungement	No		X	X	X			
Utah	Yes	k Yes, sealing only	No	X	X	X				X
Vermont	Yes	Yes, both sealing and expungement	Yes							X
Virgin Islands	nr									
Virginia	Yes	Yes, both sealing and expungement	No		X					
Washington	Yes	l Yes, expungement only		X	X	X				X
West Virginia	Yes	Yes, expungement only	No		X	X				
Wisconsin	No	m No	No							A court order is provided by the record subject
Wyoming	Yes	Yes, expungement only	Yes	X						

Table 20 explanatory notes:

- na (not available).
- nr (not reported).
- unk (unknown)

† Record sealing and record expungement definitions and practices vary widely across the states. For the purpose of this information, the following definitions apply:

Sealed record: Record is restricted from public access and is generally unavailable for employment and licensing purposes. Sealed records may be accessed on a limited basis—e.g., criminal justice employment, law enforcement investigations, research purposes, etc.

Expunged record: All hard copy and electronic information about the arrest is destroyed/obliterated. No information about the arrest or disposition is retained, and it is therefore unavailable for any purpose once expunged.

Data footnotes:

- a. In the 2021 legislative session, the expungement law was changed to include felony and misdemeanor convictions.
- b. In 2020 Arizona did not have an expungement or sealing law. A law to expunge marijuana was passed by voters and went into effect in July 2021.
- c. Only juvenile records are expunged. Adult records are sealed.
- d. GCIC does not approve or deny record restrictions. They are approved by prosecutors or by court order. Very few are processed by GCIC; most are entered by disposition.
- e. Under Guam law, a person seeking to expunge his/her criminal record must petition the court to expunge the criminal record. Petitions to expunge are filed as a separate civil action and not in the underlying criminal case record.
- f. The survey's use of the term "removal" is Indiana's "expunged." Both the survey question and Indiana's use of "sealed" are the same; however, Indiana has a third category of "Marked Expunged," as it is defined by Indiana law under IC 35-38-9-7.
defined in IC 35-38-9-7
- g. Maine does not seal or expunge records.
- h. In Maryland, sealing, expungement and shielding requests start at the court. CJIS does not approve or deny any such requests. Once a request is approved, it is forwarded to CJIS for processing.
- i. Montana also removes non-convictions. If a person was not convicted of the charge(s), the arrest is removed from the system (expunged). The state may keep limited information for statistical purposes. Sealed records are not tracked.
- j. Records that are sealed are authorized for inspection pursuant to Nevada Revised Statute (NRS) 179.301. However, inspection is only authorized for specific statutory reasons by authorized personnel and agencies; otherwise, records that are sealed are deemed never to have occurred pursuant to NRS 179.285.
- k. Utah statute defines expunge as: "'Expunge' means to seal or otherwise restrict access to the individual's record held by an agency when the record includes a criminal investigation, detention, arrest, or conviction." When a record is expunged in Utah, it no longer appears on the criminal history record. But the definition provided in this survey for sealing aligns more closely with Utah's process than does the definition for expungement in this survey.
- l. There is no adult sealing statute in Washington state.
- m. The State repository does not seal or expunge records. Rather, the process is facilitated and the record is removed locally upon a court order. The record in question is then reviewed and subsequently removed following receipt of a petition from the subject of the record where it is removed from file and not available for subsequent use.

Table 20a. Record sealing and expungements, 2020 (continued)

State	Repository tracks the number of sealing/expungement requests it receives	Petition-Based Records Relief			State-Initiated Records Relief	
		Number of sealing requests received from courts/individuals	Number of expungement requests received from courts/individuals		Number of records sealed without petition	Number of records expunged without petition
Total		2,846,542 a	298,408 a		1,553,017	503,941

Wisconsin	No					
Wyoming	Yes	0	169			

Table 20a explanatory notes:

- na (not available).
- nr (not reported).

Data footnotes:

- a. The number of sealing/expungement requests approved or denied does not equal the total number of requests received, as not all requested and received requests were processed during the reporting period.
- b. Sealed and expunged records are counted together as one number.

Survey of State Criminal History Information Systems, 2020

Since 1989, the *Survey of State Criminal History Information Systems* has been used to collect the nation's most complete, comprehensive and relevant data on the number and status of state-maintained criminal history records and on the increasing number of operations and services involving noncriminal justice background checks provided by the state repositories. This data collection is supported by Cooperative Agreement No. 2019-RU-BX-K001 awarded by the Bureau of Justice Statistics, Office of Justice Programs, U.S. Department of Justice. **Please note: Completion of the survey is voluntary; however, doing so is a special condition placed on all National Criminal History Improvement Program (NCHIP) and NICS Act Record Improvement Program (NARIP) awards.**

If you use the online survey tool, accessible at <http://www.searchgroup.org/surveys/repository/>, to enter 2020 data, you can view previously submitted 2018 data for comparison purposes. Where applicable, your state's 2018 responses are displayed in color within each section of the online survey. It is hoped that this information will help you complete the survey more accurately and efficiently. **The cover letter provides the password to gain access to your state's online survey.** Direct your questions or comments to SEARCH staff Dennis DeBacco at 775-412-1950 or dennis@search.org.

If it is more convenient, you may request a PDF copy of the survey, complete it manually, and fax (916-392-8440) or e-mail it to the attention of Dennis DeBacco at dennis@search.org. **The deadline for survey submission is April 14, 2021.**

The survey is divided into five sections. You may submit each section independently and not necessarily in the order presented. This is done so that different people on your repository's staff may submit the data for which they are responsible. **Repository directors are responsible to see that the survey is submitted in its entirety.** Please note the following:

1. All reported data should be for calendar year 2020, or as of December 31, 2020.
2. The term "felony" includes any crime classified as a felony under your state's laws. These offenses are generally punishable by a term of incarceration in excess of one year. If your state's laws do not use the term "felony," please substitute functional equivalents, such as class 1, 2, 3 and 4 offenses in New Jersey and class A, B and C offenses in Maine.
3. Questions that seek responses based on a "legal requirement" refer *only* to a *state statute* or a *state administrative regulation having the force of law*.
4. If additional space is needed, please use the "Additional Comments" area at the end of each section.
5. Please use the "Additional Comments" area at the end of each section to provide explanatory notes for responses that require explanation or when "no data is available," and to describe significant changes between the current response and data reported in the 2018 survey.
6. If a question is not applicable to your repository, **please note the question number and indicate "NA" in the "Additional Comments" area at the end of each section.**

Burden Statement

Under the Paperwork Reduction Act, we cannot ask you to respond to a collection of information unless it displays a currently valid OMB control number. The survey will be sent to criminal history repositories in 56 jurisdictions, including the 50 States, the District of Columbia, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico and the U.S. Virgin Islands. The average time required for each agency to complete the survey is estimated at 6.5 hours. Send comments regarding this burden estimate or any aspect of this survey, including suggestions for reducing this burden, to the Director, Bureau of Justice Statistics, 810 Seventh Street, NW, Washington DC 20531. Do not send your completed form to this address.

SECTION I: REPOSITORY

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

The following questions relate to descriptions of your state's criminal history record information and master name index databases:

1. How many subjects (individual criminal offenders) were in your criminal history file as of December 31, 2020? **Tables 1 & 2**

(a) Automated records _____ *(include subjects whose records are partially automated)*
(b) Manual records _____
(c) Total records _____ (a+b)

2. Fingerprints processed in 2020: **1a**

<u>Purpose</u>	<u>Number</u>	<u>Percentage of 2020 volume</u>	<u>Totals</u>
(a) Criminal (retained)	_____	_____ %	
(b) Criminal (not retained)	_____	_____ %	(a+b) _____
(c) Noncriminal (retained)	_____	_____ %	
(d) Noncriminal (not retained)	_____	_____ %	(c+d) _____
(e) What was the <u>total number</u> of fingerprint-based background checks conducted during 2020?			(a+b+c+d) _____

3. (a) Do you have felony conviction flagging (i.e., does your criminal history record database include a data field or flag enabling you to quickly determine whether a given record subject has a felony conviction)? **5**

- Yes, all subjects with felony convictions
 Yes, some subjects with felony convictions

No

(b) Does your state's criminal history record employ flagging to indicate the following?
(Check all that apply.)

- Sex offender registrant
- Violent offender
- Misdemeanor domestic violence conviction that would exclude someone from purchasing a firearm
- Active protection order on file with state justice information system and/or NCIC
- Active warrant on file with state justice information system and/or NCIC
- Mental health adjudication
- DNA available
- IFFS, indicating ineligible for firearms purchase under federal law
- IFFS, indicating ineligible for firearms purchase under state law
- Other (*describe*) _____

(c) Does your state's criminal history repository employ an Interstate Identification Index (III) multi-state record indicator flag?

Yes No

(d) If yes, as of December 31, 2020, how many subjects in your state's criminal history records database have out-of-state records? _____

The following questions refer to repository administration, procedures and practices.

4. (a) As of December 31, 2020, did your repository conduct "lights out" processing of fingerprints (an identification decision is made without fingerprint technician intervention)? *If no, skip to question 5.* **5d**

Yes No

(b) What percentage of fingerprints was handled with "lights out" processing? _____ %

(c) What percentage of criminal fingerprints was handled with "lights out" processing? _____ %

(d) What percentage of noncriminal applicant fingerprints was handled with "lights out" processing? _____ %

5. (a) Does your state maintain a protection order file? *If no, skip to question 6.* **3**

Yes No

(b) How many active records were in the state protection order record database as of December 31, 2020?

_____ records

(c) In 2020, what was the average time elapsed between the issuance of a protection order and entry of the information into the state protection order file?

- 1 day or less
- 2–7 days
- 8–30 days
- More than 30 days

(d) Are protection orders entered onto the FBI-NCIC Protection Order File? *If no, skip to question 6.*

- Yes
- No

(e) In 2020, what was the average time elapsed between the issuance of a protection order and entry of the information into the FBI-NCIC Protection Order File?

- 1 day or less
- 2–7 days
- 8–30 days
- More than 30 days

6. (a) Does your state maintain a warrant file? *If no, skip to question 7.* **4**

- Yes
- No

(b) In 2020, what was the average time elapsed between the issuance of a warrant and entry of the information into the state warrant file?

- 1 day or less
- 2–7 days
- 8–30 days
- More than 30 days
- N/A – State does not maintain a warrant file

(c) How many records were in the state warrant database as of December 31, 2020?

_____ records

(d) Of this total, indicate the number of:

Felony warrants _____

Misdemeanor warrants _____

Other (*explain*) _____

(e) In 2020, what was the average time elapsed between the issuance of a warrant and entry of the information into the FBI-NCIC Wanted Person file? **4a**

- 1 day or less
- 2–7 days
- 8–30 days
- More than 30 days

7. In addition to criminal history information, to what other records does your state's repository provide access? (*Check all that apply.*) **5a**

- Sex offender registry
- Orders of protection
- Wanted persons/warrants
- Retained applicant prints
- Firearm registration
- Domestic violence incident reports
- Other (*specify*) _____

8. (a) Does your repository conduct routine internal data quality audits? *If no, skip to question 9.* **5b**

- Yes
- No

(b) How frequently?

- More than once per year
- Annually
- Every 2 years
- Every 3 years
- Other (*briefly describe*) _____

9. (a) Does your repository conduct routine external data quality audits of contributing agencies? (E.g., inspecting samples of records maintained to determine if they have been submitted to the repository and/or checking to see if the information housed by the repository matches that maintained by contributing agencies.) *If no, skip to question 10.*

- Yes
- No

(b) How frequently?

- More than once per year
- Annually
- Every 2 years
- Every 3 years
- Other (*briefly describe*) _____

10. (a) Does your agency have any CCH performance reporting tools (dashboards, reports, etc.) that enable you and your staff to regularly monitor submissions by contributing agencies (e.g., courts, prosecutors and corrections)? **5c**

Yes No

(b) If yes, which metrics do you monitor? (*Check all that apply.*)

- Number of arrests reported by agency
- Arrests that are missing dispositions
- Time from arrest to disposition
- Number of dispositions reported by law enforcement agencies
- Number of dispositions reported by prosecutors
- Number of dispositions reported by courts
- Dispositions that cannot be linked to a corresponding arrest
- Date of disposition to when it is reported to the state repository

11. (a) Does your agency send reports of missing arrests and/or dispositions to contributing agencies? (*Check all that apply.*)

Yes No

(b) If yes, which agencies? (*Check all that apply.*)

- Law enforcement agencies
- Prosecutors
- Courts
- Other (*briefly describe*) _____

12. (a) Does your agency make data quality metrics available to contributing agencies (e.g., dashboards showing missing arrests and dispositions, number of records submitted and rejected, etc.)? (*Check all that apply.*) **5d**

Yes No

(b) If yes, which agencies? (*Check all that apply.*)

- Law enforcement agencies
- Prosecutors
- Courts
- Other (*briefly describe*) _____

ADDITIONAL COMMENTS:

SECTION II: ARREST/FINGERPRINT REPORTING, RECORD ENTRY AND REMOVAL

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

1. How many felony arrests were reported to your repository during calendar year 2020?

_____ arrests **8**

2. How many arrest fingerprints were submitted to your repository during 2020? (a+b+c = d)

(a) _____ via livescan **10**

(b) _____ via cardscan

(c) _____ hard copy fingerprints

(d) _____ = total arrest fingerprints

3. (a) As of December 31, 2020, was there a backlog of arrest fingerprint cards to be entered into the AFIS database (i.e., not entered within 48 hours of receipt at repository)? *If no, skip to question 4.* **10a**

Yes No

- (b) How many arrest fingerprint cards were backlogged? _____

Size of arrest fingerprint card backlog as of December 31, 2020, is not available

- (c) What is the age of the backlogged arrest information?

1 month or less
 2–6 months
 7–12 months
 More than 1 year

4. For the year ending on December 31, 2020, what percentage of arrest fingerprint records received by the repository were rejected for poor quality? _____ % **10**

5. Mobile technology

(a) Are agencies in your state using mobile technology to transmit fingerprints for identification purposes? **10c**

Yes No

(b) Are agencies in your state using mobile technology to transmit fingerprints for booking purposes?

Yes No

(c) Do you have plans to implement mobile technology that captures non-fingerprint biometric information?

Yes No

Question 5(d) addresses Rapid ID technology, which enables authorized users to instantly search local, state and federal AFIS databases to confirm the identity of a person via fingerprints captured using mobile or tethered fingerprint devices, and to query various criminal justice databases for additional information about the individual. Rapid ID searches, for example, can include criminal history record information, outstanding warrants, sex offender status, probation and parole supervision status, caution indicators, and mugshots.

(d) Does your state employ Rapid ID? If no, skip to question 6.

Yes No

Number of searches conducted in 2020 _____

Number of hits in 2020 _____

6. Law enforcement agency submissions

(a) Number of law enforcement agencies that submit arrest prints via livescan (including agencies without livescan devices that receive livescan services from agencies that do have that equipment, such as a sheriff that provides booking services for multiple local police departments) **8a** _____

(b) Number of agencies that submit arrest fingerprints via cardscan _____

(c) Number of agencies that submit hard copy arrest fingerprint cards _____

(d) Percentage of arrest prints submitted via livescan during 2020 _____ %

7. Do local law enforcement agencies in your state routinely cite and release individuals without fingerprinting? This includes issuance of a notice to appear when a person is charged with a crime, but is not fingerprinted prior to a court appearance. **9**

- Yes, only for violations
- Yes, for both violations and misdemeanors
- Yes, for all criminal offenses, including felonies
- No (*skip to question 9*)

8. If local law enforcement agencies in your state routinely cite and release individuals without fingerprinting, is there a law or policy requiring the courts to order persons who have not been fingerprinted to do so prior to or after an initial court hearing? **9a**

- Yes, by law (*Check all that apply.*)
 - only for violations
 - for both violations and misdemeanors
 - for all criminal offenses, including felonies
- Yes, by policy or administrative rule (*Check all that apply.*)
 - only for violations
 - for both violations and misdemeanors
 - for all criminal offenses, including felonies

No

9. Does your state have a statewide criminal citation file? (*Note: this does not include traffic citation files.*) **9**

- Yes
 - Number of criminal citations contained in file as of December 31, 2020 _____
 - Number of citation records added to file during 2020 _____
- No

10. (a) Upon receiving a Death Certificate from an authorized source, does your repository remove a decedent's criminal history record from your state's criminal history file?

9b

Yes No

(b) If yes, how many deceased persons records were removed from your state's criminal history records database in 2020? _____

(c) Are fingerprints of the decedent required before a record can be removed?

Yes No

11. (a) Does your state repository purge its criminal history database of records when the subject of the record reaches a certain age (e.g., 99 years old)?

Yes No

(b) If yes, at what age? _____

(c) Is there a requirement to determine if an age-qualified subject has had new information recently posted to his/her criminal history record that would cause the record to remain on file regardless of the record subject's age? (E.g., new information posted within 1 year, 5 years, 10 years, etc.)

Yes No

(d) How many records of age-qualified subjects were purged from your criminal history file in 2020? _____

ADDITIONAL COMMENTS:

SECTION III: DISPOSITIONS

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

The following questions seek to determine to what extent the records in your criminal history record database contain final case disposition information. (“Final case disposition” is defined as the formal or informal conclusion of an arrest or charge at whatever stage it occurs in the criminal justice process. E.g., release by police after arrest without charging; decline to proceed by prosecutor; or final trial court disposition.)

1. Does your state collect charge tracking information (sometimes referred to as “interim disposition information”) on the criminal history record showing the status of a case as it moves through the justice system? (E.g., reporting of an indictment, charges filed that are different than arrest charges, etc.) **6b**

Yes No

2. (a) How many final case dispositions did your repository receive during 2020? **6 & 6a** _____ dispositions

(b) Of those, how many were sent to the FBI? _____ dispositions

Of the dispositions forwarded to the FBI:

- (c) What percentage was sent by Machine Readable Data (MRD), such as tape/CD/DVD? _____ %
- (d) What percentage was sent via hard copy/paper? _____ %
- (e) What percentage was sent by Interstate Identification Index (III) message key? _____ %
- (f) What percentage was sent via a secure web portal? _____ %

*Note: When calculating the percentage of arrests with final dispositions recorded, some states consider an arrest to have a disposition if **any** final disposition can be associated with an arrest cycle. This is commonly referred to as “cycle matching.” Other states do not consider an arrest to have a final disposition until **all** arrest charges are linked to a final disposition. This is commonly*

referred to as “charge matching.”

3. Does your state perform cycle or charge matching to calculate the percentage of arrests in the criminal history database with final dispositions? **1**
 Cycle matching
 Charge matching
4. What percentage of all arrests in the criminal history database have final case dispositions recorded?
(a) Arrests entered within past 5 years _____ %
(b) Arrests in the entire database _____ %
(c) Felony charges _____ %
5. (a) Of the dispositions received at the repository during 2020, what percentage could not be linked to a specific arrest record, either because of failed matching criteria or the arrest had not been reported to the repository? **7a** _____ %
(b) When a disposition cannot be matched to an arrest, the following action(s) is taken: *(Check all that apply.)*
 Placed in a suspense file (no further action)
 Placed in a suspense file for further investigation
 Disposition information is rejected
 Follow-up actions are taken by repository staff
 Court is contacted
 Court-provided charge(s) and corresponding disposition is posted to the beginning or end of record
 Other _____
6. (a) As of December 31, 2020, was any court disposition data reported directly to the repository by automated means? *(Note: “automated” refers to a method by which data is transmitted by the court to the repository where it is matched against criminal history records and entered on the criminal history record, usually without manual intervention. This does not include dispositions received via fax or email, which require manual activity for criminal history record matching and data entry.)* **7**
 Yes No *(skip to question 6d)*
(b) How many court disposition records were:
 Received via automated means through a centralized (statewide) court case management system _____
 Received via the local courts’ case management systems _____

(c) What percentage of dispositions was reported in 2020 by automated means?

_____ %

(d) How are records matched between the court system and the repository? (*Check all that apply.*)

- Process Control Number (PCN) or Transaction Control Number (TCN) assigned when fingerprints were taken at time of arrest/booking
- PCN or TCN assigned subsequent to arrest/booking
- State Identification Number
- Arrest Number
- Name
- Date of birth
- Charges
- Other (please explain) _____

7. In 2020, what was the average time elapsed between the occurrence of final felony court case dispositions and receipt of information concerning such dispositions by the repository? **7b**

- 1 day or less
- 2–7 days
- 8–90 days
- 91–180 days
- 181–365 days
- More than 1 year

8. In 2020, what was the average time elapsed between receipt of final felony court disposition information by the repository and entry of that information into the criminal history record database?

- 1 day or less
- 2–7 days
- 8–30 days
- 31–90 days
- 91–180 days
- 181–365 days
- More than 1 year

9. (a) As of December 31, 2020, was your state using any livescan devices in courtrooms/courthouses to link positive identifications with dispositions? *If no, skip to question 10.* **12**

- Yes
- No

(b) How many livescan devices are in courtrooms/courthouses?

_____ devices

10. (a) As of December 31, 2020, was there a backlog of court disposition data to be entered into the criminal history record database (i.e., not entered within 48 hours of receipt at the repository, including dispositions that could not be matched to a criminal history record within 48 hours of receipt at the repository)? *If no, skip to question 11.*

Yes No

(b) How many unprocessed or partially processed court case dispositions did you have?

11. (a) Does the repository receive any final case disposition information (e.g., decline to proceed) from local prosecutors? *If no, skip to question 11c.* **6c**

Yes No

(b) This information is: (*Check all that apply.*)

- Received via automated means through a centralized (statewide) prosecutors' case management system
- Received via the local prosecutors' case management system
- Paper-based
- A mix of automated and paper-based

(c) How are records matched between prosecutors and the repository? (*Check all that apply.*) **6d**

- Process Control Number (PCN) or Transaction Control Number (TCN) assigned when fingerprints were taken at time of arrest/booking
- PCN or TCN assigned subsequent to arrest/booking
- State Identification Number
- Arrest Number
- Name
- Date of birth
- Charges
- Other (please explain) _____

12. Does your state post indictment information to the criminal history record? **6b**

Yes No

ADDITIONAL COMMENTS:

SECTION IV: NONCRIMINAL BACKGROUND CHECKS

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

BACKGROUND CHECKS

1. (a) Does your state charge a fee to conduct a search of the criminal history record database for noncriminal justice purposes? *If no, skip to question 2.* **17**

Yes No

- (b) How are fees allocated?

- All fees go to the state general fund, with repository funded by general fund allotment
- A percentage of fees go to support repository operations _____ %
- All fees go to support repository operations
- Other _____

2. Please indicate which of the following background checks are performed by your state pursuant to law. *(Check all that apply.)* **15**

	National check	State check only
Daycare providers		
Caregivers–residential facilities		
School teachers		
Non-teaching school personnel (including volunteers)		
Volunteers working with children		
Prospective foster care parents		
Prospective adoptive parents		
Relative caregivers		
Nurses/Elder caregivers		
Legal guardians		
Hazardous materials licensees		
Medical marijuana (dispensers, caregivers)		

FINGERPRINT-BASED SEARCHES

3. (a) Has your state privatized the taking of fingerprints for noncriminal justice purposes?

If no, skip to question 4. **11**

Yes No

(b) Is this service provided by?

A single vendor Multiple vendors

(c) Does the vendor(s) assess a fee above what the state charges to perform the background check?

Yes, Fee \$ _____ No

(d) Does the vendor provide any additional services besides the fingerprint capture?

(E.g., evaluating responses for the requestor, sending responses back to the requestor, etc.)

4. (a) Total number of noncriminal justice fingerprints

submitted to the repository via livescan during 2020 **10b** _____

(b) Total number of noncriminal justice fingerprints
submitted to the repository via cardscan during 2020 _____

(c) Percentage of noncriminal justice fingerprints
submitted via livescan during 2020 _____ %

(d) Percentage of noncriminal justice fingerprints
submitted via cardscan during 2020 _____ %

5. What information is contained in the results for fingerprint-based noncriminal justice background checks? (*Check all that apply.*) **14**

- Full record
- Convictions only
- Juvenile records
- Arrests without disposition—over 1 year old
- Other _____

6. What percentage of fingerprint-based noncriminal justice transactions are identified against arrest fingerprints?

_____ %

7. Does the repository attempt to locate missing disposition information before responding to a fingerprint-based noncriminal justice inquiry?

Yes No

NAME-BASED SEARCHES

8. How many name-based noncriminal justice background checks did your repository perform in 2018? (a+b+c+d = e) **13**

(a) Received via Internet _____
(b) Received via mail _____
(c) Received via telephone _____
(d) Other _____
(e) Total _____

INTERNET ACCESS

9. Does your repository provide web-based noncriminal justice background checks to the public? **18**

Yes No

10. Are fees involved for Internet access for the general public (not including any registration or account fees)?

Yes, Fee \$ _____ No

BULK SALE OF CRIMINAL HISTORY DATA

11. (a) Do you provide bulk copies of criminal history records to private background check companies? **16**

Yes No

- (b) If so, how are data provided? (*Check all that apply.*)

One-time data extractions
 Subscriptions
 Other (*briefly describe*) _____

- (c) If a subscription service is offered, how frequently are subscriptions updated/validated?

Annual updates
 Monthly updates
 Weekly Updated

Other (*briefly describe*) _____

12. How are private background check companies notified if records have been sealed/expunged or are otherwise no longer considered public records? (*Check all that apply.*) **16a**

- Email
- Website
- Mail
- Other (*briefly describe*) _____

13. What are the legal obligations on the part of private background check companies to update records received from the state CCH repository?

- Updates must be made within 7 days
- Updates must be made with 30 days
- Updates must be made quarterly
- Other (*briefly describe*) _____

SECTION V: RECORD SEALING AND EXPUNGEMENTS

This section completed by

Name _____ Title _____

Agency _____

Phone _____ Email _____

Date completed _____

Record sealing and record expungement definitions and practices vary widely across the states. For the purpose of answering questions in this section, the following definitions apply.

Sealed Record: Record is restricted from public access (if such access is available in your state) and is generally unavailable for employment and licensing purposes. Sealed records may be accessed on a limited basis – e.g., criminal justice employment, law enforcement investigations, research purposes etc.

Expunged Record: All hard copy and electronic information about the arrest is destroyed/obliterated. No information about the arrest or disposition is retained, and it is therefore unavailable for any purpose once expunged.

Since all states have some degree of automatic sealing or expungement of juvenile records, the following questions only apply to adult criminal history records.

1. Do you have statutes and/or policies that define procedures for criminal history record sealing and/or expungement? **20**
 Yes, sealing only
 Yes, expungement only
 Yes, both sealing and expungement
 No

2. If a record is sealed, is it still accessible for research purposes?
 Yes No

3. How are requests to seal/expunge records received? (*Check all that apply.*)
 In-person

- Mail
- Fax
- Online Portal/Website
- System-to-system request (e.g., courts submit requests from their RMS to the repository)
- Other (describe) _____

4. (a) Does your repository track the number of sealing/expungement requests it received in 2020? **20a**

- Yes
- No

(b) If yes, how many requests to seal records were received in 2020? _____

(c) If yes, how many requests to expunge records were received in 2020? _____

5. (a) Does your repository track the number of sealing/expungement requests it approved in 2020? **n/r**

- Yes
- No

(b) If yes, how many records were sealed in 2020? _____

(c) If yes, how many records were expunged in 2020? _____

6. (a) Does your repository track the number of sealing/expungement requests it denied in 2020? **n/r**

- Yes
- No

(b) If yes, how many requests to seal records were denied in 2020? _____

(c) If yes, how many requests to expunge records were denied in 2020? _____

7. What are the most common reasons that requests to seal/expunge records are denied?
(Check all that apply.) **n/r**

- Offense/crime for which the request is made is not eligible for sealing or expungement
- Individual's criminal history makes him/her ineligible
- Outstanding fines, fees, restitution, etc.
- Insufficient time has passed since the offense/conviction occurred
- Failure to provide necessary documentation to support the request
- Other (describe) _____

AUTOMATIC SEALING AND EXPUNGEMENT

Some states have adopted laws and/or policies to automatically seal/expunge records — i.e., where the subject of the record does not have to file a petition to have the record sealed or expunged. Questions 8–10 are only concerned with automatic sealing and expungements.

8. In 2020, were any records automatically sealed/expunged in your state? **n/r**

- Yes, sealing only
- Yes, expungement only
- Yes, both sealing and expungement
- No

9. How many adult records were automatically sealed in 2020? _____ **20a**

10. How many adult records were automatically expunged in 2020? _____
